SITOP PSU8200 24 V/40 A stabilized power supply input: 120/230 V AC output: 24 V DC/40 A

reclifical Product Detail Page	Tittps://i.siemens.com/TP0EP3337-0SB00-0A10	
nput		
type of the power supply network	1-phase and 2-phase AC	
supply voltage at AC	Automatic selection; startup starting from Ue ≥ 90/180 V	
supply voltage	120 V/230 V 85 132 V	
input voltage 1 at AC		
input voltage 2 at AC	170 264 V	
wide range input	No	
buffering time for rated value of the output current in the event of power failure minimum		
operating condition of the mains buffering		
line frequency		
line frequency		
input current		
 at rated input voltage 120 V 	15 A	
 at rated input voltage 230 V 	9 A	
current limitation of inrush current at 25 °C maximum	50 A	
I2t value maximum	8 A²·s	
fuse protection type	Yes Recommended miniature circuit breaker at 1-phase operation: 16 A characteristic C; required at 2-phase operation: circuit breaker 2-pole connected or circuit breaker 3RV2421-4BA10 (120 V) or 3RV2411-1JA10 (230 V)	
fuse protection type in the feeder		
output		
voltage curve at output	Controlled, isolated DC voltage	
output voltage at DC rated value	24 V	
output voltage		
 at output 1 at DC rated value 	24 V	
output voltage adjustable	Yes; via potentiometer	
adjustable output voltage	24 28 V; max. 960 W	
relative overall tolerance of the voltage		
relative control precision of the output voltage		
on slow fluctuation of input voltage	0.1 %	
on slow fluctuation of ohm loading	0.1 %	
residual ripple		
maximum	100 mV	
• typical	50 mV	
voltage peak		
• maximum	240 mV	
• typical	220 mV	

display version for normal operation	Green LED for 24 V OK; LED yellow for overload; LED red for short-circuit or latching shutdown	
type of signal at output	Relay contact (NO contact, rating 60 V DC/ 0.3 A) for "24 V OK"	
behavior of the output voltage when switching on	Overshoot of Vout approx. 3 %	
response delay maximum	1.5 s	
voltage increase time of the output voltage		
• typical	30 ms	
output current		
rated value	40 A	
rated range	0 40 A; +60 +70 °C: Derating 3%/K	
supplied active power typical	960 W	
short-term overload current		
 on short-circuiting during the start-up typical 	120 A	
at short-circuit during operation typical	120 A	
duration of overloading capability for excess current		
 on short-circuiting during the start-up 	25 ms	
at short-circuit during operation	25 ms	
constant overload current		
 on short-circuiting during the start-up typical 	60 A	
bridging of equipment	Yes; switchable characteristic	
number of parallel-switched equipment resources for increasing	2	
the power		
efficiency		
efficiency in percent	92 %	
power loss [W]		
 at rated output voltage for rated value of the output current typical 	82 W	
 during no-load operation maximum 	6.8 W	
closed-loop control		
relative control precision of the output voltage with rapid	1 %	
fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical	1.9 %	
setting time		
• load step 50 to 100% typical	2 ms	
• load step 30 to 100 % typical		
relative control precision of the output voltage at load step of resistive load 10/90/10 % typical	2 ms 3.8 %	
setting time		
setting time • load step 10 to 90% typical	1 ms	
• load step 10 to 90% typical	1 ms	
load step 10 to 90% typicalload step 90 to 10% typical	1 ms	
load step 10 to 90% typicalload step 90 to 10% typicalmaximum		
load step 10 to 90% typical load step 90 to 10% typical maximum protection and monitoring	1 ms 1 ms	
load step 10 to 90% typical load step 90 to 10% typical maximum protection and monitoring design of the overvoltage protection	1 ms 1 ms < 32 V	
load step 10 to 90% typical load step 90 to 10% typical maximum morotection and monitoring design of the overvoltage protection property of the output short-circuit proof	1 ms 1 ms < 32 V Yes	
load step 10 to 90% typical load step 90 to 10% typical maximum morotection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	1 ms 1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown	
load step 10 to 90% typical load step 90 to 10% typical maximum moretection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	1 ms 1 ms < 32 V Yes	
I load step 10 to 90% typical I load step 90 to 10% typical maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability	1 ms 1 ms <a "="" href="https://www.nc.nc/401/2012/ed-2012/2012/2012/2012/2012/2012/2012/2012</td></tr><tr><td>load step 10 to 90% typical load step 90 to 10% typical maximum design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation</td><td>1 ms 1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown</td></tr><tr><td>I load step 10 to 90% typical I load step 90 to 10% typical maximum I protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value</td><td>1 ms 1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown 41 A 250% lout rated up to 25 ms, 150% lout rated up to 5 s/min</td></tr><tr><td>I load step 10 to 90% typical I load step 90 to 10% typical maximum I protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical</td><td>1 ms 1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown 41 A 250% lout rated up to 25 ms, 150% lout rated up to 5 s/min 41 A</td></tr><tr><td>I load step 10 to 90% typical I load step 90 to 10% typical maximum I crotection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit</td><td>1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown 41 A 250% lout rated up to 25 ms, 150% lout rated up to 5 s/min</td></tr><tr><td>load step 10 to 90% typical load step 90 to 10% typical maximum rotection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection</td><td>1 ms 1 ms 1 ms 32 V	
I load step 10 to 90% typical I load step 90 to 10% typical maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output	1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown 41 A 250% lout rated up to 25 ms, 150% lout rated up to 5 s/min 41 A LED yellow for "overload", LED red for "latching shutdown" or "short-circuit" Yes	
I load step 10 to 90% typical I load step 90 to 10% typical maximum I protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical overcurrent overload capability in normal operation enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation	1 ms 1 ms 1 ms < 32 V Yes Alternatively, constant current characteristic approx. 41 A or latching shutdown 41 A 250% lout rated up to 25 ms, 150% lout rated up to 5 s/min 41 A LED yellow for "overload", LED red for "latching shutdown" or "short-circuit" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178

security information		

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
