

PTC FAN HEATER

CSF 028 | 250 W, 400 W

CSF 028 with DIN clip

CSF 028 with screw mount tabs

- > Compact size
- > Integrated pre-set thermostat
- > Quiet operation

- > Heating power adjusts to ambient temperature
- > DIN rail or screw tab mount available

The CSF 028 fan heater prevents formation of condensation and provides evenly distributed interior air temperature in enclosures. The touch-safe plastic housing and the small size makes it ideal for use in enclosures with a high packing density. The heater is equipped with a fixed set point thermostat and is easily wired via external pressure clamps. Two different mounting options are available – DIN rail or screw tabs. The robust screw tab mounting is particularly suitable for applications with high vibration.

ACCESSORIES

Air guide for improved heat distribution

The air guide is an accessory part for use with the fan heater CSF 028. It can easily be clipped onto the protective grill of the fan heater without use of any tools, and diverts the exiting warm air by 45°. This results in an overall improved heat distribution within an enclosure or cabinet. The temperature above the protective grill is reduced by up to 68 °F/20 °C (measured approx. 3.9"/100 mm above protective grille) and may make the use of custom heat ducts obsolete.
