Discover the unlimited possibilities of Rexroth's automation systems. They integrate all control and drive components to provide optimum automation solutions: state-of-the-art, ultra-efficient, and highly future-proof.

# Rexroth frequency converters

Comprehensive basic functions support you in implementing ventilation and air-conditioning technology applications.

With vector control, you can configure dynamic pump drives for energy-efficient operation of hydraulic or cooling lubricant assemblies on machine tools.

You can use variable frequency drives (VFD) for straightforward and cost-effective automation of conveyor systems, while ensuring a demand-oriented material supply.

Rexroth frequency converters have all interfaces needed for simple integration into production facilities in a wide range of industries.

## Rexroth frequency converters

Straightforward, scalable, cost-effective

- ▶ Easy, fast commissioning via the integrated operating panel
- ▶ Minimal installation effort, simple installation
- ▶ Scalable output and functions for a wide range of applications
- ▶ Cost-effective through energy-efficient operation of variable frequency drives (VFD)

With its variable frequency drives (VFD), Rexroth offers both economical and easy-to-handle solutions for a wide variety of applications where energy-efficiency is a top priority. Variable frequency drives (VFD) help to reduce operating

expenses and minimize CO<sub>2</sub> emissions. These VFDs with a power range from 0.4 kW to 160 kW offer an excellent price-performance ratio, simple operation, and comprehensive basic functions.

### EFC 3600

Compact, cost-efficient, and energy-efficient drive solution for U/f operation for the power range from 0.4 kW to 4 kW. Simple commissioning and installation for a wide range of applications

- ▶ Ventilation and air-conditioning technology
- ▶ Environment and process technology
- ▶ Food and beverage industry
- ▶ Pumps and fans
- ▶ Conveyor technology and logistics
- ▶ Machine tools and packaging systems

### Frequency Converter Fv

Optimized drive solution for automation in the power range from 0.4 kW to 90 kW. The different control modes voltage/frequency (U/f), sensorless vector control or field-oriented vector control enable use in

- ▶ Material transport
- ▶ Hydraulics applications
- ▶ Rubber and plastics processing machines
- ▶ Paper, printing, and converting machines
- ▶ Textile machines

### Frequency Converter Fe

Cost-effective converter solution for U/f operation for the power range from 0.75 kW to 160 kW. Typical applications include use in

- ▶ Ventilation and air-conditioning technology
- ▶ Pumps and fans
- ▶ Transport, storage, and conveyor technology
- ▶ Machine tools
- ▶ Paper, printing, and converting machines

# EFC 3600 – technical data

## Highlights

- ▶ Load-dependent adaptation of the Voltage frequency graph
- ▶ Maximized energy efficiency and minimized motor noises through continuously adjustable pulse frequency
- ▶ Integrated brake chopper and mains filter
- ▶ Integrated operating panel for simple and quick commissioning
- ▶ Simple installation via to plug-in I/O connecting terminals

Frequency converter EFC 3600 –  
type code

**EFC3600-0K40-1P2-MDA-7P-NNNN**

**Continuous output**

E.g. 0K40 = 0.4 kW

**Mains connection**

1P2 = 1 AC 200 ... 240 V

3P4 = 3 AC 380 ... 480 V

**EFC 3600 communication module**

M = Modbus

P = PROFIBUS

**Protection category**

A = IP20

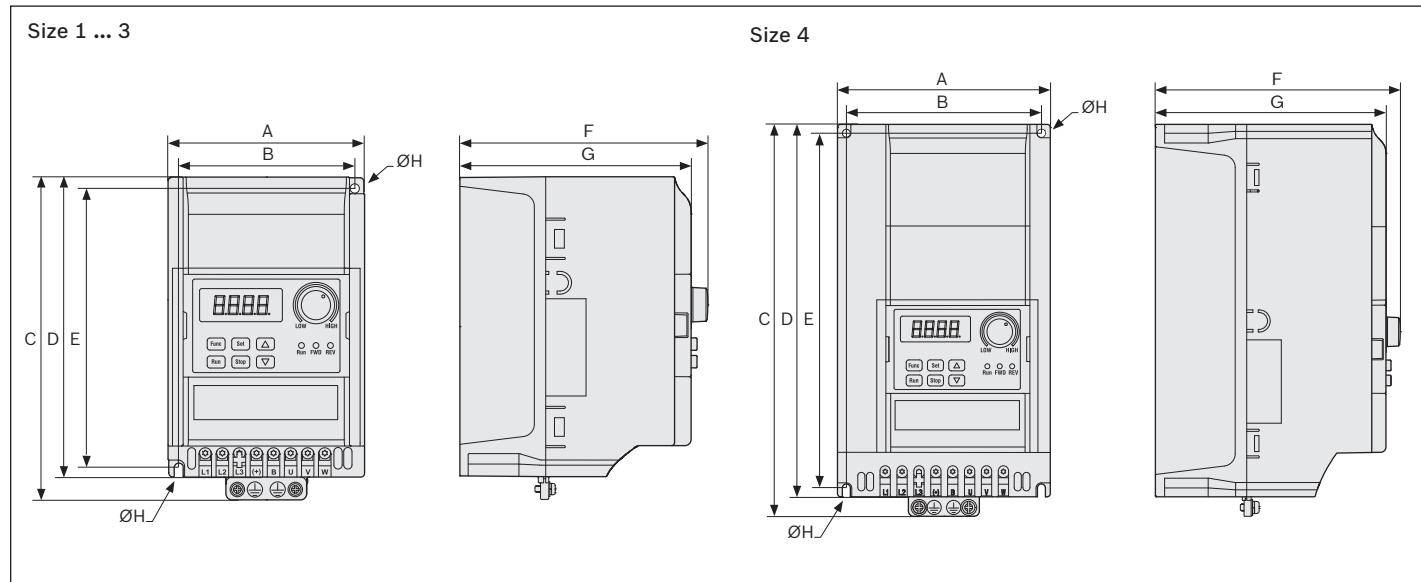

**EMC protection class**

D = Class C3 – industrial use

Type	EFC 3600

# Frequency Converter Fv – technical data

## Highlights

- ▶ Several operating modes for different applications
- ▶ Easy to operate and service (detachable fan, LCD operating panel with copy function)
- ▶ Advanced functions and high performance
- ▶ Integrated mains filter
- ▶ Parameterization and start-up with PC software
- ▶ Worldwide availability and service

Frequency Converter Fe 160 kW, 3 AC 380 ... 480 V, 50/60 Hz, 325 A	FECP02.1-160K-3P400-A-BN-MODB-01V01	R912001767

## Accessories

Description	Type code	Material number
<b>PROFIBUS interface (slave)</b>		
Communication adapter to connect a Frequency Converter Fe to a PROFIBUS master	FEAA02.1-MODB*-PROFI-NNNN-NN	R912001501
Connection cable for PROFIBUS interface, 1 m	FRKB0001 001,0	R912001756
Connection cable for PROFIBUS interface, 5 m	FRKB0002 005,0	R912001757

# Frequency converter accessories – mains filters, brake resistors and brake choppers

## Mains filter

Mains filters ensure that the EMC limit values are adhered to and suppress leakage current generated by line capacitors. Our mains filters are optimally coordinated with the power units and are scalable in regards to current, number of drives and motor cable length. They can be combined with shielded motor cables for trouble-free operation conforming to EN 61800-3, Category C3 for

- ▶ Rexroth EFC 3600 with single cable lengths of up to 30 m
- ▶ Rexroth Frequency Converter Fv and Fe with single cable lengths of up to 75 m

## Brake resistors

When using the Rexroth Frequency Converters Fv and Fe in regenerative operation there is a choice of particularly compact brake resistors for various different levels of power consumption.

The brake resistor is easy to mount near the converter, saving space. The robust construction and high dielectric strength of the resistor elements enables high power and impulse loading. The resistor elements are flameproof and are protected from harmful environmental factors by their encapsulation.

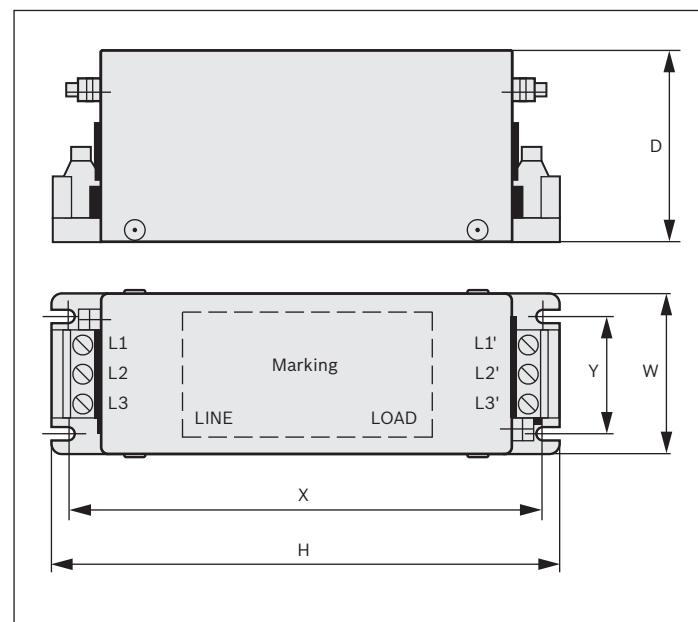

## Brake chopper

Brake choppers are used together with an external braking resistor to increase the braking power for Rexroth frequency converters with a power range higher than 15 kW. The FELB brake chopper is controlled by frequency converter FVCA, FECG, or FECP.

# EFC 3600 mains filter – dimensions and technical data

They can be combined with our shielded motor cables for trouble-free operation conforming to EN 61800-3, category C1 for cable lengths up to 5 m, category C3 for cable lengths up to 30 m.

Mains filter EFC 3600	Continuous current A	Dimensions					Weight kg	Material number

For optimal combinations with frequency converters, see the selection guides on pages 31 and 32.

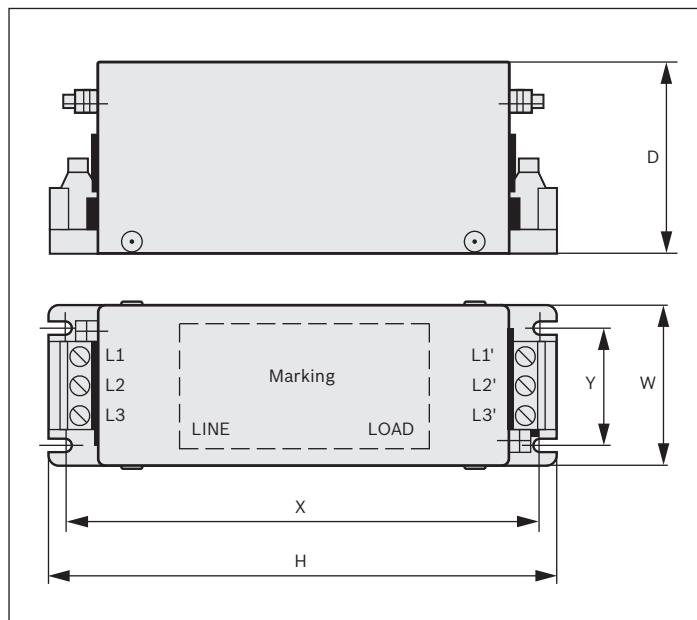

# Frequency Converter Fv and Frequency Converter Fe mains filters – dimensions and technical data

## Frequency converter Fv mains filter

They can be combined with our shielded motor cables for trouble-free operation conforming to EN 61800-3, category C3 for cable lengths from 50 m (up to 7.5 kW) to 75 m (from 11 kW).

## Frequency converter Fe mains filter

They can be combined with our shielded motor cables for trouble-free operation conforming to EN 61800-3, category C3 for cable lengths up to 75 m.

The above table lists the optimal combination of frequency converter, brake chopper, and brake resistor and the number of components required to operate a frequency converter with respect to a given moderating ratio OT.

The three digits listed for the various models (x/x/x) each stand for a specific braking ratio: digit 1 ~ OT = 10%, digit 2 ~ OT = 20%, digit 3 ~ OT = 40%. The specific value (1, 2, 3 or 4) corresponds with the number of components required to operate a frequency converter.

# Software

## Commissioning software

“ConverterPC” software can be used for the commissioning and remote control of Rexroth frequency converters. A standard serial interface is used for communication. ConverterPC makes it easy to specify converter speeds, control start and stop, and adjust device parameters. The software also provides functions that are not available when operating the converter locally via the operating panel. One or more converters (max. 247 devices) can be connected to a computer via a Modbus network to create a control network with ConverterPC.

Frequency Converter Fv:

Software version: Converter\_PC\_01V07

Frequency Converter Fe:

Software version: Converter\_PC\_7.010

EFC 3600:

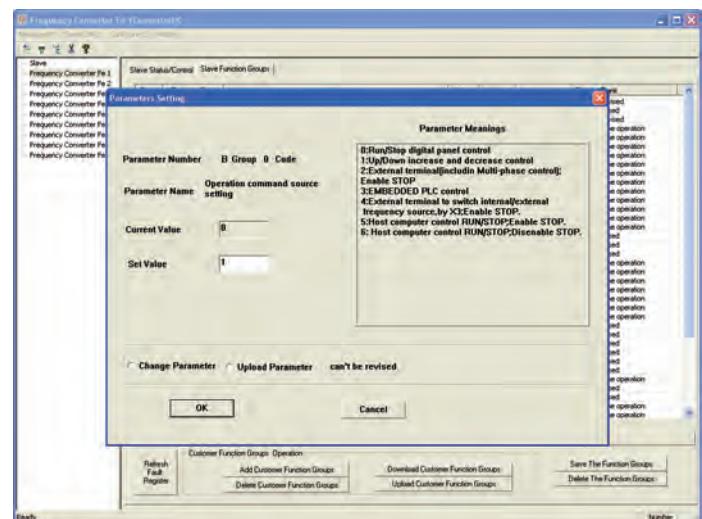

Software in preparation

## System requirements for software use on a PC

- ▶ Processor: Pentium 100 MHz or faster
- ▶ Operating system: Windows XP, Windows 7
- ▶ Display resolution: 1024 x 768
- ▶ Memory: 1 GB free disk space

The software is available as free download on the respective online catalog pages:
