THERMOKON AT A GLANCE

Thermokon Headquarters in
Mittenaar-Offenbach

Managing Directors: Harald Zygan and Jörg Teichmann

Employees: approx. 150

- 1987** Company founded in Mittenaar
- 1994** New building in Aarstraße 6 in Mittenaar-Bicken
- 1997** Extension of company building
- 2000** Extension of company building to 2000 sqm office and production space
- 2007** Extension of the building by 600 sqm
- 2011** Another extension of the building by 600 sqm
- 2014** New company building in Mittenaar-Offenbach, 5.600m² space for office, production and warehouse space

Susidiaries:

- 1998** Thermokon Components GmbH, Austria
- 2002** Thermokon-Danelko Elektronik AB, Sweden
- 2011** Thermokon Automation Equipment Co. Ltd., China
- 2013** Thermokon Americas LP, USA
- 2013** Thermokon Sensortechnik Schweiz AG, Switzerland
- 2014** Thermokon Norge AS, Norway

Export Initiative Energy Efficiency

Thanks to energy-efficient products and services in the field of energy efficiency, Thermokon also contributes internationally to a safe and cost-effective energy supply, which is of paramount importance to the climate protection.

Thermokon: We help to build the future – by sensors made in Germany!

KEEP IN TOUCH WITH THE FUTURE

The drive of any business is essential for its performance and innovative strength. Our drive represents supporting future generations and the opportunity to shape the future. Our innovative power and the daily pursuit of improvement leads to four simple ways of thinking that we believe to be trendsetting and the future:

URBANIZATION

More people are moving from the countryside into cities. Today approx. 280 million people live in megacities – defined as cities with more than 10 million inhabitants. This movement arises from better job opportunities, housing options and living standards in metropolises. These urban conurbations are a huge push factor for the economy due to helping improve the housing situation and also ensuring most efficient solutions for energy saving and utilities.

DEMOGRAPHIC CHANGE

A healthy and conscious lifestyle along with improved health and a massive increase in life expectancy. In 1950 life expectancy was approx 46.6 years old, experts now predict life expectancy of 72 years by 2025. This does not only increase the population from 6 billion to about 8 billion by 2025, but also changes the requirements for age-appropriate living and adapted technologies in different areas of building automation.

GLOBALIZATION

The desire to see the unattainable, to discover foreign cultures and to promote worldwide business, led to an increase of global trading volume by more than 28 times over the past 50 years. The number of German „global players“ - Internationally operating companies - rose from 17,000 in 1980 to over 70,000.

Language barriers must be overcome and customer satisfaction must be secured in different ways. Globalization is an incredible and exciting topic for all companies worldwide.

CLIMATE CHANGE

Even though the subject of climate change isn't as present in media as it was a couple of years ago, it represents the most important factor in our actions and innovation initiative. Annual natural disasters clearly demonstrate the need for more efficient and sustainable technologies.

Earth's atmosphere now has the highest CO₂ concentration for 350000 years, due to industrialization and unlimited progress. Industrialized countries currently benefit, allowing a shift to more efficient technologies and waste management strategies, which is urgently required and also now affordable.

To us, these ideas lead to exciting approaches for innovative and efficient products that can be produced and distributed sustainably worldwide.

Managing Director and Founder
Harald Zygan

INTEROPERABLE SYSTEM INTEGRATION

World's leading companies in building services united to EnOcean Alliance in spring 2008. Self powered, battery less, wireless EnOcean technology for flexible room layouts and maintenance-free sensing solutions. EnOcean Alliance represents the development of interoperable standards as well as the future security of an innovative wireless sensor technology. Thermokon is one of the founding members of the EnOcean Alliance and also employs Vice Chairman Frank Neudecker, who works closely together with the Chairman Graham Martin and the EnOcean Alliance.

BACnet Interest Group Europe (BIG-EU) is the European industry association for application of the global BACnet standard ISO 16484-5 (since January 2003). BACnet is a manufacturer-independent communication protocol specifically designed for building automation.

BACnet was and is developed by the American Society of Heating Refrigerating and Air-Conditioning Engineers (ASHRAE). Development began in June 1987 to provide a single uniform company-neutral standard for data communication.

KNX technology is a worldwide standard for all applications in the field of home and building control, including the control of lighting, water, blinds, heating, ventilation, as well as air conditioning, monitoring, alarming, and security systems, energy management and household appliances, audio / video and more.

KNX is the worldwide standard for home and building control with a single manufacturer- and product-independent commissioning tool (ETS), with a complete set of transmission media (TP, PL, RF and IP) as well as a complete set of configuration modes (system and easy mode). KNX is a European Standard (CENELEC EN 50090 and CEN EN 13321-1) and accepted as an international standard (ISO / IEC 14543-3).

LonMark represents LON technology, a globally spread and standardized communication and automation protocol with a variety of comprehensive applications in any type of building or property.

The idea of LON development is interoperability. Thousands of companies around the world develop and deliver interoperable LON devices. LonMark system integrators use these products to leverage building automation solutions, such as control of primary systems, the management level or sub-segments such as room automation.

Since the development of Modbus protocol in 1979, it is now a standard for industrial communication. It is available free of charge. Modbus/TCP significantly enhanced Ethernet communication in the building automation industry. The combination of a versatile and wide spread network (Ethernet) along with a universal network standard (TCP/IP) and a manufacturer-independent representation of data (Modbus) make up an open system for the exchange of process data. Furthermore, it is easy to implement all devices supported by TCP / IP which currently provides fast, flexible and effective communication in industrial networks.

YOUR + AT THERMOKON

WHAT CHARACTERIZES THERMOKON

+ Quality- & design oriented products

+ Qualified contact persons in sales and support

+ Most temperature sensors with SI-Protection against external humidity

+ Products made in Germany, German Engineering

+ Tailor-made room solutions supporting all common BUS systems

+ Technically experienced representatives in every field = close contact with you

+ 5 year warranty

+ Product variety to equip complete buildings from one hand

+ Quick delivery time for standard sensors and BigPoint items

+ 28 years of market experience

+ Customized types & special solutions for your desired switch design

+ Fast cost estimation due to uniform price and discount groups

+ more than 250.000 wireless sensors in the field

+ International distribution network and global support in more than 20 countries

EasySens Transmitter

Innovative self-powered wireless technology generates energy by means of harvesting ambient light or motion. Interoperable, cost-effective and energy-efficient solutions in building automation are available using our wireless sensor system EasySens.

EasySens – EASYSSENS – WIRELESS SENSOR SYSTEM

Innovative wireless solar technology enables the control of temperature and ventilation in buildings using ambient light as power source. Time-consuming, expensive installation costs such as wiring and cabling are unnecessary.

Low material costs and time saving installations enable competitively priced system solutions. EasySens offers significantly more flexibility in regards to the sensor location, allowing for a variable room layout in modern buildings.

Even in historically protected buildings where no architectural changes are allowed, sensors for air-conditioning technology can be easily integrated.

The EasySens system uses a standard data profile conforming to EnOcean (IEC Standard 14543-3-10). Therefore, it is guaranteed that the wireless sensors and receivers by Thermokon can be combined with devices of other manufacturers without any problems.

There are different devices for monitoring of temperature, relative humidity, light, set point adjustment and status detection.

Among others, receivers are available with LON-, EIB/KNX-, RS485-, or BACnet interface and are designed as a gateway to be integrated with superior control systems. Connection to other bus systems is feasible without any problems.

» ADVANTAGES AT A GLANCE

- » No batteries, thus almost maintenance-free
- » Simple installation, no wiring
- » Flexibility of installation layout
- » Significant reduction in energy consumption
- » Flush mounting possible wherever needed (no cables)
- » Cost-effective system solutions
- » Environmental and protection of resources
- » Frequencies available: 868 MHz; 902 MHz (North America); 928 MHz (Japan); 315 MHz on request
- » Minimal transmitting power (10 mW) with safe radio transmission
- » Transmitting range up to 30 m in buildings and up to 300 m in free field
- » Interoperable
- » International standard (IEC 14543-3-10)

enocean[®] alliance
No Wires. No Batteries. No Limits.

EasySens – SMART ACKNOWLEDGE

The self-powered room operating unit SR06 LCD has the ability to illustrate data on the display such as presence or window statuses. There is also an option for external reset of given set points.

For bidirectional communication of energy-autonomous devices EnOcean offers Smart-Acknowledge technology. As usual the control unit periodically transmits data and measured values to a gateway (1) and goes back to sleep. After a short break of a few milliseconds, set by learning in the SR06 LCD wakes up again and transmits a second, so called reclaim-telegram (2). This shows the gateway that the device is ready for reception. The SR06 LCD is now ready to receive telegrams for a few milliseconds, so the gateway has to answer immediately without delay (3). If the gateway does not respond instantly, the SR06 LCD goes back to sleep, to save energy. The use of repe-

aters is not possible in this application, due to delays in signal run time in both directions.

Compatibility

Pending the availability of Smart-Acknowledge-enabled gateways, the first generation of SR06 LCD is delivered as a unidirectional version. From now on energy independent room operating units support Smart-Acknowledge and are capable of communicating bidirectional as well as illustrating commands and messages on the display.

Before using a bidirectional SR06 LCD, check if the device supports Smart-Acknowledge technology.

airScan

EFFICIENT ORGANIZATION & TIME SAVING

The intuitive software application for computers based on Windows software is designed for uncomplicated organization and implementation of EasySens projects. Communication is done by a wireless radio USB flash drive, which can be mounted on site in the receiver position using a USB extension cable. Free software updates will keep the user up to date with the latest technological developments.

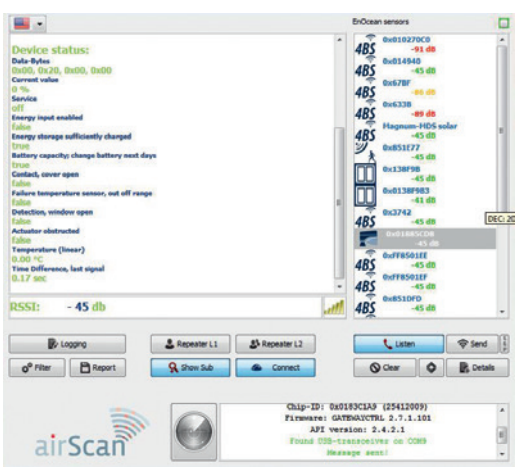

The self-explaining interface shows all relevant information and data. The signal strength of the transmitters are illustrated with traffic light colored values (RSSI) which give an indication of the correct placement of transmitter and receiver. All received telegrams are listed and directly assigned to the product and the details of the telegrams are displayed in text. The bidirectional USB flash drive AirScan also includes an integrated repeater function for which it can be used as a receiver, for processing and transmission of EnOcean telegrams.

» BENEFITS AT A GLANCE

- » Support for optimum mounting of EnOcean products
- » Monitoring function for simple evaluation of radio telegrams in text format
- » Generation and transmission of EnOcean telegrams
- » Compatible with all manufacturers
- » Supports the EEP2.6.1 standard
- » Data logging function
- » Email report and FTP upload function
- » Export of data for further processing/ analysis in CSV, XML or XLS file formats
- » Free software updates
- » USB flash drive compatible to airConfig

» USER-ORIENTED DESIGN

- » AirScan shows signals in various display options
- » Colour symbols or graphs provide information for the signal strength, respectively RSSI values of a received EnOcean telegram

airScan illustrates signals in different display variants

» PROFESSIONAL EVALUATION

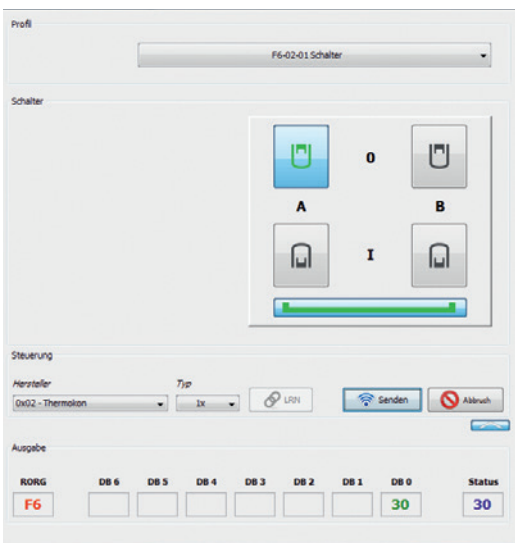

airScan records all incoming telegrams. Telegrams can be evaluated (classification of data bytes, RSSI values, sub-telegrams, and more...). In addition to the manual export function, collected data can be forwarded automatically to a FTP server or an email account.

airScan saves all received telegrams in the back

» GENERATION OF TELEGRAMS

airScan allows to simply generate and transmit telegrams quickly. With a configurator, the user can take all EnOcean profiles from a predefined EEP selection and define the selected telegram content through input boxes. AirScan immediately generates the corresponding telegram and shows the values when required. The telegram can be easily transferred into BMS software.

using the configurator the user is able to define telegram data for transmission

airConfig

COMMISSIONING MADE EASY

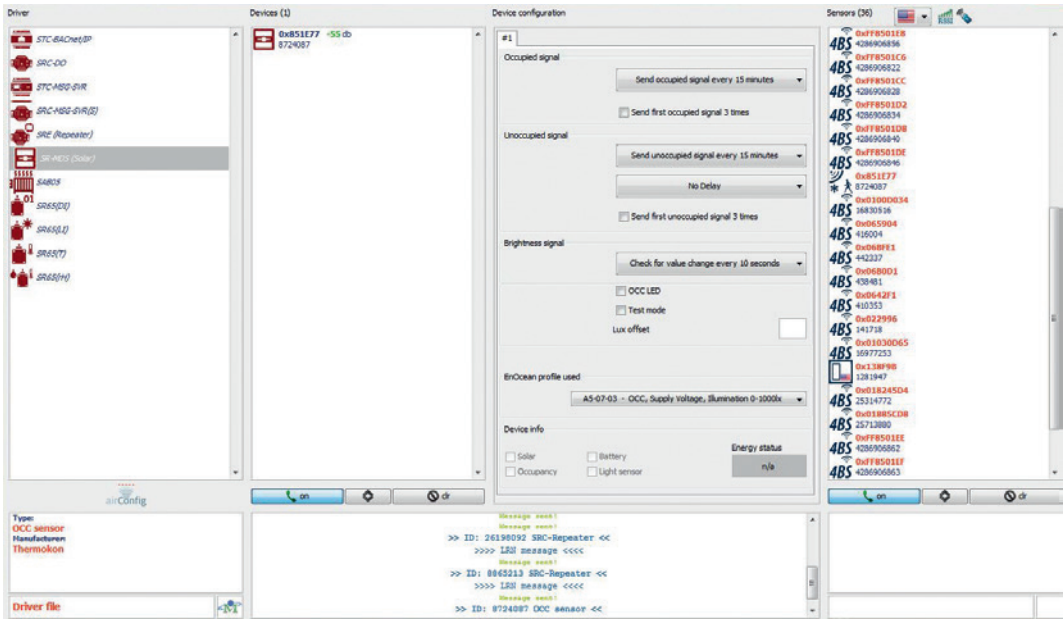

In addition to the field strength-measuring tool airScan, Thermokon now offers the new free software tool airConfig which allows remote commissioning of EasySens EnOcean products. Remote commissioning means parameterization respectively learning of sensors into a receiver without interacting directly with the device.

airConfig uses EnOcean radio technology to parameterize devices through special remote commissioning commands. Only the AirScan USB transceiver and the free airConfig software (which can be downloaded from the download centre on www.thermokon.de) are required.

The software is available for all Windows-based computers and also runs on the Microsoft Surface Tablet.

» BENEFITS AT A GLANCE

- » Reduced storage: one receiver, multiple functions (e.g. control of heating, ventilation, lighting and more)
- » Flexibility
- » Variable parameters – simple on screen
- » PC configuration

Using EnOcean radio devices are configured via special remote software

» START-UP AND CONFIGURATION

- » Secure communication with unlimited devices
- » Selected device blocked for other learning processes
- » Selectable functions
 - e.g. measuring range strength, EEPROMs
- » Individual designation of devices/ information text
- » Choice of EnOcean timing
- » Configuration of time & date
- » Programming of sensors via drag & drop
- » Remote maintenance & programming without additional tools
- » Project file: Saving/Export of all settings with all shortcuts
- » Restoration/Import of devices from other project files
- » Password protection
- » Identification by visual and/or acoustic feedback
- » Configuration for transmitting identical/duplicate settings to multiple devices simultaneously

Programming and configuration of sensors using airConfig is done easily by drag & drop, no tools are required. Configuration parameters such as wakeup cycles, measuring ranges or output functions can be adapted directly in the settings of the device and transmitted by radio signals via airConfig.

» FLEXIBILITY

- » later changes of product functionality is no problem
- » Products can be configured before mounting at the customer
- » Changes of specification can be fulfilled in the field

» SAFTEY

- » Protect your projects and products using password
- » EnOcean Rolling-Code encryption to protect communication
- » Prevents unauthorized persons to access network

» SUPPORT

- » Decentralized access to products and project information via remote access
- » Identification via visual or acoustic feedback
- » Structured display of installed products showing unique device ID

» BENEFITS

- » Communication without wires and batteries
- » Change possible without stopping hotel operations
- » Fastest time for installation and commissioning
- » Essential enhancement in comfort with max. energy saving (up to 70%)

PLACE TO FEEL COMFORTABLE – YOUR HOTEL

All EasySens devices wirelessly communicate via EnOcean radio. Temperature, set point, air quality, occupancy and switching signals are received and transmitted to superior communication protocols such as KNX, BACnet, LON or Modbus. This system ensures the possibility to reset all used automation elements to standard values

» BENEFITS

- » Communication without wires and batteries
- » Change possible without stopping hotel operations
- » Fastest time for installation and commissioning
- » Essential enhancement in comfort with max. energy saving (up to 70%)

PLACE TO FEEL COMFORTABLE – YOUR HOTEL

All EasySens devices wirelessly communicate via EnOcean radio. Temperature, set point, air quality, occupancy and switching signals are received and transmitted to superior communication protocols such as KNX, BACnet, LON or Modbus. This system ensures the possibility to reset all used automation elements to standard values

thanos SR

The touch screen room operating unit thanos is designed for detection of temperature and humidity as well as integrated operation of HVAC, lighting and blinds for room control. High-graded optics ideal for design-oriented applications. Programmable operating functions can be flexibly adapted to suit various room applications.

thanos LQ white

TECHNICAL DATA

Model	thanos L: 195x80x17 mm thanos LQ: 80x195x17 mm thanos S: 125x80x17 mm
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Protocol	LON, RS485 Modbus
Power supply	15..24 V = ($\pm 10\%$) or 24 V ~ ($\pm 10\%$) 80..240 V ~ on request (not available for BUS versions)
Power consumption	typ. 2,0 W (24 V =) 4,0 VA (24 V ~)
Measured values	Temperature rel. humidity (rH) optional
Measuring range temperature	0..+50 °C
Measuring range humidity	0..100% rH
Accuracy temperature	$\pm 0,5$ K
Accuracy humidity	$\pm 3\%$ at range 20..80% rH (typ. at 21 °C)
Control functions	Light ON/OFF/DIM Calling scenes Blinds UP/DOWN/SET Fan stages Switching order Setpoint
Clip material	Anodized aluminium
Clip functions	Configurable (occupancy, light on/off,...)
Occupancy buttons	Individually configurable using PC software
Digital inputs	Can be set to window contact, dew point guard, key card switch, room frequency, alarm, event
Display	3,5" TFT, 320x640 pixel, capacitive touch technology
Display showing	Showing room temperature, setpoint, operation mode, fan stage, occupancy, error, date and time,... ECO note (several steps, red to green) Graphic and foto: Instead of date and time individual colour graphics (175x50 or 320x240 pixel) can be shown (e.g. company logo or hotel name)
Buttons labelling	L/LQ: Flexible insert (for up to 8 touch buttons below/beside clip)
Ambient temperature	0..+50 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	white, black
Enclosure material	PC, Glass
Installation type	Flush mounted with standard EU box
Notes	For details see software description (www.thermokon.com)

Highlights

Versions

The device can communicate independently with a receiver, as a stand-alone solution, or it can be integrated into a BUS system along with a gateway.

New functions / button configuration

Scene buttons / scene channels (0..9), operating mode (heating, cooling, dehumidifying, off), along with the previous universal on/off, there is now a new universal +/-.

for thanos without radio please refer to „Room Operating Units“

Graphics / images

Customer specific graphics can be illustrated in the upper display area (e.g. company logo or hotel name).

ECO display

Several stages from red to green.

SRo6 LCD

Self powered Room temperature and humidity sensor with LCD display and optional, set point and fan stage adjustment for room/space applications. Compatible with various design frames 55x55 mm.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	Solarcell
Measured values	Temperature rel. humidity (rH) optional
Measuring range temperature	0..+40 °C
Measuring range humidity	0..100% rH
Accuracy temperature	±0,4 K
Accuracy humidity	±5% at 30..70% rH
Frame design Berker	S1 B3 B7 Glas
Frame design Gira	E2 Standard55 Esprit Event
Frame design Jung	LS990 LS-design A500 AS500 Aplus A creation
Frame design Merten	M-Smart M-Arc M-Plan
Control functions	Fan stages Setpoint
No. of buttons	2 (type 2T) 4 (type 4T)
Interval	Every 100 sec. at change >0.8 K. Every 1000 sec. at change <1.6 K Configurable
LCD	29x12 mm, monochrome (optional)
Ambient temperature	-25..+65 °C
Protection	IP20
Enclosure colour	pure white brilliant aluminium anthracite
Enclosure material	PC
Installation type	To be mounted flat onto the surface using adhesive foil or screws
Notes	The devices are supplied with an integrated battery backup For configuration an optional adapter cable is necessary Energy storage can be reloaded with a separate USB-Cable Customer-specific labelling possible on request

LC-SR04 rH

LC-SR04 rH

Room sensor for humidity and temperature detection in illuminated room/space applications. With the device no operating elements are possible, transmitting intervals are not adjustable and no battery expansion is available.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	Solarcell
Measuring range temperature	0..+40 °C
Measuring range humidity	0..100% rH
Accuracy temperature	±0,5 K at range +17..+27 °C
Accuracy humidity	±5% at 30..70% rH
Interval	Every 100 sec. at change >0,8 K or >1,6% rH otherwise every 1000 sec.
Ambient temperature	-25..+65 °C
Protection	IP30
Enclosure colour	pure white
Enclosure material	ASA
Installation type	To be mounted flat onto the surface using adhesive foil or screws
Notes	No operating elements possible. Telegram intervals not adjustable. No battery backup available

SR65 rH

Radio sensor for detection of temperature and rel. humidity in outdoor areas, cold stores, greenhouses, production plants and warehouses. Self powered Enocean wireless technology. To be parametrized via airConfig.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	Solarcell
Measuring range temperature	-20..+60 °C 0..+40 °C
Measuring range humidity	0..100% rH
Accuracy temperature	depending on setup
Accuracy humidity	±5% at 30..70% rH
Interval	Configured via airConfig
Ambient temperature	-20..+70 °C
Protection	IP30
Enclosure colour	pure white Cover transparent
Enclosure material	ASA

SR65 rH	540391	245,00

SR04 CO2

For detection of CO2 and temperature (optional) and humidity (optional) integrated into one unit.

SR04 Co2 LCD

SR04 CO2-Z

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	max. 1,5 W (24 V =) 3,6 VA (24 V ~)
Measuring range CO2	0..2550 ppm
Measuring range temperature	0..+50 °C
Measuring range humidity	0..100% rH
Accuracy CO2	±75 ppm or 10% of measuring range (typ. at 21 °C)
Accuracy temperature	±1% of measuring range (typ. at 21 °C)
Accuracy humidity	±3% at range 20..80% rH (typ. at 21 °C)
Calibration	Self calibration dual channel
Sensor type	NDIR
LCD	29x12 mm, monochrome (optional)
Traffic light functionality (-Z)	3 LEDs showing air quality (opt.)
Ambient temperature	0..+50 °C
Ambient humidity	>85% rH
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white
Enclosure material	ASA
Installation type	Installation on standard flush mounting box. Base part can be mounted and wired separately Surface mounting

SR-MDS

SR-MDS

Ceiling multi sensor for light and motion detection using EnOcean radio technology.

TECHNICAL DATA	
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..240 V ~ (±10%) 3x battery LS14250, 3,6 V
Measured values	Light Motion
Detection range RDI	Ø=5 m at a sensor height of approx. 2,7 m
Measuring range light	0..512 Lux
Sensor type	PIR (passive infrared)
Interval	Every 10 sec. at change of brightness >10 lux in case of detected motion Every 100 sec. at change of brightness <10 lux in case of detected motion Every 1000 sec. at change of brightness <10 lux in case of no motion detected Every 100 sec. at change of brightness >10 lux in case of detected motion Immediately at status change from no motion to motion or reverse.
Ambient temperature	+10..+50 °C
Protection	IP20
Enclosure colour	pure white black
Enclosure material	ABS
Notes	Appropriate for constant light control

» BENEFITS

- » Communication without batteries or cables
- » Interoperable
- » Energy-efficient control of heating and lighting
- » High working and learning comfort through air conditioning and blind control as required

1

SR04 CO2

Room sensor CO2/temperature/
rel. humidity
Available with display and traffic
light function

2

SR04

Surface-mounted wireless room
sensor for temperature & rel. humidity
Available with various control
elements and features

3

Mini

Wireless switch 2-/4-channel
lighting/blinds
Available in various colours

4

STC-DO8 / STC-PLUS 4DO

Universal receiver with 8 digital outputs, with
expansion module STC-Plus 4DO for control of heating/
cooling/ fan coils, for switching lights/ blinds,
signal contact and more.

5

SRC-DO / SRC-AO

Flush-mounted receiver (24 V or 230 V) with digital
or analogue outputs for control of thermostats,
humidistats, fans or temperature, for switching of
lights or blinds, and more

CONCENTRATION

All devices used communicate wirelessly via EnOcean technology. Temperature, set point, air quality, occupancy and switch signals for lighting and blinds, are transmitted via bidirectional receivers, STC-DO8/ STC-Plus 4DO resp. SRC-DO/ SRC-AO as standalone with local digital or analogue outputs or to superior communication protocols such as KNX, BACnet, LON or Modbus. This system allows a substantial increase in comfort along with optimum energy savings.

STC65-RS485 Modbus

STC65-RS485 Modbus

With interface RS485, Modbus protocol, IP42-enclosure. For evaluation of up to 32 EasySens sensors or wireless switches. Transmission of field-programmed telegrams to 8 addresses. Incl. ext. receiving antenna (2,5 m).

TECHNICAL DATA	
Network technology	RS485 Modbus
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 0,6 W (24 V =) 1,5 VA (24 V ~)
Antenna	External antenna 2,5 m
Direction	Bidirectional
Receive channels	32 (Rx)
Transmit channels	32 (Tx) 32 (SAB)
Display	LED „Valid“ to show valid EnOcean telegrams
Ambient temperature	-20..+60 °C
Protection	IP42
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white Cover transparent
Enclosure material	PA6 PC with quick lock screws
Included standard accessories	External receiving antenna 2,5 m
Notes	Magnetic antenna plate form L, 180x180 mm, recommended to improve radio coverage

STC65-RS485 EVC

STC65-RS485 EVC

With serial interface RS485, bi-directional interface „Multiple Access“, IP42-enclosure. For connection of up to 32 EasySens sensors or wireless switches to different controllers with RS485 interface. Transmission of field-programmed telegrams to 127 addresses. Incl. ext. receiving antenna (2,5 m).

TECHNICAL DATA	
Network technology	RS485 EVC
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 0,8 W (24 V =) 2,0 VA (24 V ~)
Antenna	External antenna 2,5 m
Direction	Bidirectional
Receive channels	Gateway mode: ∞ (Rx) Filter mode: 32 (Rx)
Transmit channels	Filter mode: 128 (Tx) Gateway mode: 128 (Tx)
Display	LED „Valid“ to show valid EnOcean telegrams

STC65-FTT LON

STC65-FTT LON

Bidirectional gateway for EnOcean-based Sensors and actuators as well as controllers and control systems with LON interface. The STC65-FTT enables the receipt and transmission of radio telegrams corresponding to the EnOcean communication protocol. With predefined sensor objects (sensor, switch, ...) and corresponding output variables (SNVT) for communication in a LON system.

TECHNICAL DATA

Network technology	LON - FT 5000
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 0,5 W (24 V =) 0,82 VA (24 V ~)
Antenna	External antenna 2,5 m
Direction	Bidirectional
Receive channels	11 (Rx)
Transmit channels	11 (Tx)
Display	LED „Valid“ to show valid EnOcean telegrams
Ambient temperature	-20..+60 °C
Protection	IP42
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white Cover transparent
Enclosure material	PA6 PC with quick lock screws
Included standard accessories	External receiving antenna 2,5 m Plug-in for turbo LONmaker
Notes	Magnetic antenna plate form L, 180x180 mm, recommended to improve radio coverage

STC-BACnet IP

STC-BACnet IP

EnOcean to BACnet IP gateway/transceiver for radio sensors and switches communicating on EnOcean radio technology and controllers with BACnet IP interface. Protocol details are available in the software documentation. Incl. ext. receiving antenna (25 m).

TECHNICAL DATA

Network technology	BACnet IP
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Interface	BACnet IP TCP/IP
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 3 W (24 V =) 5 VA (24 V ~)
Antenna	External antenna 2,5 m
Direction	Bidirectional
Ambient temperature	0..+50 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Connection	RJ45
Enclosure colour	light grey
Enclosure material	ABS
Installation type	Mounting on DIN rail.
Included standard accessories	External receiving antenna 2,5 m

STC-KNX

STC-KNX

For connection of up to 32 EasySens sensors or wireless switches to the EIB/KNX-Bus. The device offers additional control functions, which can be set to:

- switch and dim
- blind UP/DOWN
- presence button/switch
- set point adjustment
- stage switch
- humidity sensor
- window contact/handle
- binary input
- light sensor
- motion sensor

TECHNICAL DATA

Network technology	KNX
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	Supply via BUS
Direction	Bidirectional
Receive channels	32 (Rx)
Transmit channels	32 (Tx)
Display	Graphic display monochrome (internal)
Ambient temperature	-5..+45 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white
Installation type	Installation on standard flush mounting box. Surface mounting

STC-KNX	535076	406,10

SRC-DO 24 V

SRC-DO

Receiver with digital outputs. Various types for Heating (PWM), Heating ON/OFF, signal contact, humidistat control, heating/cooling (PWM) or fan stage control. Flush mounted.

TECHNICAL DATA

Relay output	max. 10 A
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%) 100..240 V ~ (not potential free)
Power consumption	100..240 V: typ. 9,8 VA; 15..24 V =: typ. 1,5 W; 24 V ~: typ. 3,4 VA
Antenna	Internal
Direction	Bidirectional
Functions	Heating/cooling ON/OFF Heating/cooling with PWM output Hygrostat controller Fan release Signal contact Switch actuator configured via airConfig
Ambient temperature	-20..+60 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	red
Enclosure material	ABS
Installation type	Flush mounted with standard EU box (Ø=55 mm)

SRC-DO (Relais)

Type	item No.	€
SRC-DO airConfig 24 V	593731	139,60
SRC-DO airConfig 230 V	593748	139,60

SRC-DO Light

SRC-DO Light

Flush mounted receiver module for EnOcean switch telegrams. For switch control of Lighting applications

TECHNICAL DATA

Relay output	max. 10 A (230 V)
Analogue output	Lighting
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	100..240 V ~
Power consumption	Standby <0,5 W
Antenna	Internal
Direction	Bidirectional
Functions	Lighting Fan control Switch actuator Staircase light
Ambient temperature	-20..+40 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	red
Enclosure material	ABS
Installation type	Flush mounted with standard EU box (Ø=55 mm)

SRC-DO Light (Relais)

Type	item No.	€
SRC-DO Light 230 V	593762	139,60

SRC-DO Blind

SRC-DO Blind

Flush mounted receiver module for EnOcean switch telegrams. For switch control of blinds.

TECHNICAL DATA

Relay output	max. 1 A (230 V)
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	100..240 V ~
Power consumption	Standby <0,5 W
Antenna	Internal
Direction	Bidirectional
Functions	Blinds/Shutter Slat changing Switch actuator
Ambient temperature	-20..+40 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	red
Enclosure material	ABS
Installation type	Flush mounted with standard EU box (Ø=55 mm)

SRC-DO Blind (Relais)

Type	item No.	€
SRC-DO Blind 230 V	593755	139,60

SRC-AO Climate

SRC-AO Climate

Thermostat temperature control for room applications. 0..10 V output, supply voltage 24 V ~ / 24 V =.

TECHNICAL DATA	
Output voltage	1x 0..10 V (V) 2x 0..10 V (VV)
Analogue output	V: Heating or cooling VV: Heating and cooling
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 1 W (24 V =) 1,5 VA (24 V ~)
Antenna	Internal
Direction	Unidirectional
Receive channels	32 (Rx)
Transmit channels	32 (Tx)
Functions	Heating/cooling continuously 0..10 V
Ambient temperature	-20..+60 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	red
Enclosure material	ABS
Installation type	Flush mounted with standard EU box (Ø=55 mm)

Type	item No.	€
SRC-AO Dim V	499606	139,60
SRC-AO Dim VV	502931	163,20

SRC-AO Multi

SRC-AO Multi

Multi functional actuator with 0..10 V output of different values/enOcean sensors (e.g. temperature, humidity, setpoint).

TECHNICAL DATA

Output voltage	1x 0..10 V (V) 2x 0..10 V (VV)
Analogue output	Multi actuator
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 1 W (24 V =) 1,5 VA (24 V ~)
Antenna	Internal
Direction	Unidirectional
Functions	Output of various values (e.g. temperature, set-point, humidity, actuating variable, dimming value)
Ambient temperature	-20..+60 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	red
Enclosure material	ABS
Installation type	Flush mounted with standard EU box (Ø=55 mm)

SRC-AO Multi (0..10 V)

Type	item No.	€
SRC-AO Multi V	508315	139,60
SRC-AO Multi VV	508322	163,20

STC-D08

STC-D08 with extension module
STC-PLUS 4DO

STC-D08

Bi-directional receiver with 8 digital outputs (or 12 with extension module STC-PLUS 4DO). For heating/cooling control, fan coil control, control of lights and blinds etc. Incl. ext. receiving antenna (2,5 m).

TECHNICAL DATA

Relay output	8 relays max. 6 A (resistive load) 12 relays with additional module STC-PLUS 4DO max. 10 A (resistive load)
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	100..240 V ~ 15..24 V = oder 24 V ~ auf Anfrage
Power consumption	typ. 2,0 W / 3,5 VA
Antenna	External
Direction	Bidirectional
Display	Graphic display monochrome
Functions	Switch actuator Lighting/Blinds/Shutter Dim/Heating/Cooling (PI) Fan-Coil controller Heating/cooling with PWM Heating with PWM
Function types	Switch actuator Heating/cooling with PWM output Fancoil
Ambient temperature	0..+60 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	white
Enclosure material	ABS
Installation type	Mounting on DIN rail.
Included standard accessories	External receiving antenna 2,5 m
Notes	Magnetic antenna plate form L, 180x180 mm, recommended to improve radio coverage

STC-ADO

STC-ADO

Universal receiver with analogue outputs 0..10 V and up to 4 relay outputs 230 V / 5 A. For connection of EasySens sensors resp. switches. Dependent on the type with a fan coil controller and change over function or dimming/heating/cooling (PI).

TECHNICAL DATA

Output voltage	4x 0..10 V (4xV)
Relay output	2 or 4 relays max. 5 A (resistive load)
Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	80..240 V ~ 15..24 V = oder 24 V ~ auf Anfrage
Antenna	External
Direction	Unidirectional
Display	LED „Valid“ to show valid EnOcean telegrams
Functions	Lighting/Blinds/Shutter Dim/Heating/Cooling (PI) Fan-Coil controller Heating ON/OFF Heating with PWM Heating/cooling with PWM
Function types	Change-Over Dimming Fancoil Heating/cooling with PWM output
Ambient temperature	0..+60 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	white
Enclosure material	ABS
Installation type	Mounting on DIN rail.
Included standard accessories	External receiving antenna 2,5 m
Notes	Magnetic antenna plate form L, 180x180 mm, recommended to improve radio coverage

NEW

STC-MSG Server

STC-MSG Server

The STC-MSG Server is a wireless controlled heating/cooling circuit controller and designed for evaluation of wireless room sensors with control of up to 8 / 16 SABox EnOcean actuators. For efficient energy saving a time switch is integrated. Furthermore, it is possible to make use of the function “energy stop” by seamlessly connecting a wireless window contact SRW01 and wireless window handle SRG01, i.e. if the window is opened, the SABox closes the valves. Parameterization of the individual functions is made via an easy to handle configuration menu.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	100..240 V ~
Power consumption	typ. 3,5 VA
Antenna	External
Direction	Bidirectional
Receive channels	8/16 (Rx)
Transmit channels	8/16 (Tx)
Display	Graphic display monochrome
Ambient temperature	0..+50 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	light grey
Enclosure material	ABS
Mounting	Mounting on DIN rail
Included standard accessories	External receiving antenna 2,5 m
Notes	Magnetic antenna plate form L, 180x180 mm, recommended to improve radio coverage

STC-MSG Server UP

STC-MSG Server UP

Wirelessly controlled heating regulator for control of up to 5 SABox valve actuators within one room in connection with wireless room sensors. Furthermore, it is feasible to make use of the function „energy stop“ by seamlessly connecting window contacts SRW01 and handles SRG01 to the SAB05, resulting in an automated closing of the valves, if a window is open. STC-MSG Server UP can learn in the following sensors: 5 EnOcean valve actuators (SAB05), 1 room operating sensor type SR04 x, SR06 x or SR07 x, 10 digital input modules SR65DI, EnOcean switches, motion sensors (e.g. SR-MDS, SR-MOW), 20 window contacts SRW01 or window handles SRG01.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	110..240 V ~
Power consumption	max. 0,5 VA
Antenna	Internal
Direction	Bidirectional
Ambient temperature	-20..+60 °C
Protection	IP20
Terminal block	Terminal block,max. 1,5 mm ²
Enclosure colour	red
Enclosure material	ABS
Installation type	Flush mounted with standard EU box (Ø=55 mm)

SAB05

SAB05

SAB05

Wireless valve actuator for bidirectional EnOcean communication. The SAB05 combines with message server and enocean transmitter.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	3 batteries (type AA)
Antenna	Internal
Direction	Bidirectional
Feedback in case of error	via radio telegram
Regulation distance	max. 3 mm automatic adaption by initialisation
Regulation time	10 mm/s
Valve actuator	battery powered Motor with electronic turn-off low noise operation battery status message
Operating mode	Actuator or selfcontrol mode
Functions and characteristics	Frost detection 8 °C Wake-Up-Timer Self control mode configurable Valve connection M30x1,5
Ambient temperature	0..+50 °C
Protection	IP40
Enclosure colour	white light grey
Installation type	Screw mounting, M30 x 1,5 Optional adapters available
Included standard accessories	3 batteries (AA)

airScan

Field Strength measuring tool for Visualizing EnOcean radio telegrams on a laptop or PC. A USB-Dongle allows for bidirectional communication, data logging and reporting.

airScan

TECHNICAL DATA

Application	Thermokon airScan consists of an USB transmitter/receiver with windows software to turn a windows personal computer to a field strength measuring tool. Measuring frequency ranges the tool is used to define best routing places for EnOcean transmitter and receiver. airScan gives a quick overview of EnOcean telegrams, reading status, ID, field strength and manufacturer for EnOcean products.
System requirements	min. Windows XP, Adobe Flash, min. USB 2.0
Shipment	USB-Stick, Software via Download
Accessories	USB extension (3 m) for optimal positioning of the transmitter/receiver, even at the ceiling.

airScan (USB-Dongle + Software)

Type	item No.	Net €
airScan (net price)	566704	100,80

EPM120

EPM120

Field strength measuring instrument for finding optimal mounting places for transmitter and receiver, display of relevant data of EasySens radio telegrams, with integrated repeater for test installations.

TECHNICAL DATA

Radio technology	EnOcean, 868 MHz (IEC 14543-3-10)
Power supply	USB plug of a PC USB plug 2 batteries (type AA)
Keyboard	4 buttons, touch technology
Display	Diagonal 5,2 cm Graphic display monochrome
Memory	All logged telegrams on a USB stick (>365 days)
Shipment standard	2 Batteries (Type AA) Nano USB stick (1 GB) USB cable

EPM120 (net price)	462006	634,50

Room Operating Units

Our room operating units are used for temperature detection and integrated operation of HVAC, lighting and blinds for single room control. A variety of sophisticated and high end designs and optional features are available.

Sample applications 95

Premium Design

thanos	High-end room operating unit	98
WRFo8	Room operating unit (2,4,8,12 buttons)	102
WRFo6 LCD	Room operating unit (4 buttons)	104

Flush-mounting

WRFo7	Flush mount room operating unit	106
WRFo6 x	Flush mount room operating unit	109

Surface mounting

WRFo4 x	Surface mount room operating unit	111
WRFo4 LCD x	Surface mount room operating unit	116

Thermostats / Fancoil

JOY	Fan coil-/heating room thermostat	119
LCF Touch	Touch fan coil room thermostat	120
LCF	Fan coil room thermostat	121
LCT	Room thermostat heating	122

» BENEFITS

- » Compatible with multiple bus systems
- » Various control elements to suit a wide range of applications
- » Flexible design options with various colours and design frames
- » Custom labels/engravings

1

Thanos L
Touch screen room operating unit, available as wireless, BUS and wireless + BUS combined.

2

WRFo6 LCD
Flush-mounted room operating unit for flexible room control, compatible to various design frames of numerous manufacturers

PERFECT WORKING CONDITIONS

The multifunctional room operating units combine high grade design along with sophisticated technology: Integrated sensors for temperature and humidity, switching signals for lighting and blinds, touch-sensitive surfaces in custom design variations. Communications via standard network technology: Create the perfect working environment.

» BENEFITS

- » Compatible with multiple bus systems
- » Various control elements to suit a wide range of applications
- » Flexible design options with various colours and design frames
- » Custom labels/engravings

WRFo8

Multifunctional room operating unit used for operation of HVAC, control of lighting and blinds, available in various colours and numerous design frames

1

2

WRFo7

Flush-mounted room operating unit, compatible with various switch designs from many manufacturers, numerous control elements and custom labels are available.

HIGH LEVEL COMMUNICATION

The multifunctional room operating units combine high grade design along with sophisticated technology: Integrated sensors for temperature and humidity, switching signals for lighting and blinds, touch-sensitive surfaces in custom design variations. Communications via standard network technology: Create the perfect working environment.

thanos

The Thanos touch screen room operating unit has integrated temperature and optional humidity sensors for operation of HVAC, lighting and blind control. By means of the high-grated optics, the Thanos is ideal for high end design applications. Programmable operating function keys allowing flexibility for custom room designs.

thanos LQ white

TECHNICAL DATA

Model	thanos L: 195x80x17 mm thanos LQ: 80x195x17 mm thanos S: 125x80x17 mm
Measured values	Temperature, rel. humidity (rH) optional
Protocol	KNX, LON, RS485 Modbus
Power supply	15..24 V (=±10%) or 24 V ~ (=±10%)
Power consumption	typ. 2,0 W (24 V =) 4,0 VA (24 V ~)
Measuring range temperature	0..+50 °C
Measuring range humidity	0..100% rH
Accuracy temperature	±0,5 K
Accuracy humidity	±3% at range 20..80% rH (typ. at 21 °C)
Control functions	Occupancy signalling, Light ON/OFF/DIM, Setup scenarios, Blinds UP/DOWN/SET, Fan stages, Setpoint
Clip material	Anodized aluminium
Clip functions	Configurable (occupancy, light on/off,...)
Occupancy buttons	Individually configurable using PC software
Digital inputs	Window contact, dew point guard, key card switch, room frequency, alarm, event
Display	3,5" TFT, 320x640 pixel, capacitive touch technology
Display showing	Room temperature, setpoint, operation mode, fan stage, occupancy, error, date and time,... ECO note (several steps, red to green) Graphic and photo: Instead of date and time individual colour graphics (175x50 or 320x240 pixel) can be shown (e.g. company logo or hotel name)
Buttons labelling	L/LQ: Flexible insert (for up to 8 touch buttons below/beside clip)
Ambient temperature	0..+50 °C
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	white, black
Enclosure material	PC, Glass
Installation type	Flush mounted with standard EU box (Ø=55 mm)
Notes	For details see software description (www.thermokon.com)

Highlights

for thanos with radio please refer to „EasySens - Transmitter“

New functions / button configuration

Scene buttons / scene channels (0..9), operating mode (heating, cooling, dehumidifying, off), along with the previous universal on/off, there is now a new universal +/-.

Graphics / images

Customer specific graphics can be illustrated in the upper display area (e.g. company logo or hotel name).

JOY

Room thermostat in elegant Thermokon design. Fancoil and heating/cooling type available.

Probably available in III.2015.

TECHNICAL DATA

Relay output	Heating: 1x 250 V ~, max. 16 A Fancoil: 5x potential free relay, max. 5 A
Network technology	RS485 Modbus
Power supply	85..260 V ~
Measuring range temperature	-10..+50 °C
Accuracy temperature	±1 °C
Sensor type	NTC10k
Changeover Sensor	Digital input or NTC10k (optional)
Inputs	1: 1x DI, potential-free or NTC10k 2: 1x DI, 230 V Passive sensor
LCD	Large LCD screen White background lighting Resolution: 240x160 px
Ambient temperature	+10..+50 °C
Ambient humidity	5..95% rH
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	white
Enclosure material	PC scratch resistant acrylic glass
Installation type	Flush mounted with standard EU box (Ø=55 mm) Base part can be mounted and wired separately

LCF Touch

LCF Touch

Modern design flush mounting fan coil room thermostat, used for individual control of temperature in commercial, industrial and residential buildings. It is tailored for two-pipe and four-pipe fan coil units with two-wire electric valves. The device combines digital technology with a large LCD touch screen display, which enables the single room controller to be used intuitively. Integrated 7 day time clock with 4 time programs.

TECHNICAL DATA

Relay output	Fan stage: 3x 250 V ~ 2-pipe version - Heating/Cooling: 1x 250 V ~ 4-pipe version - heating: 1x 250 V ~ + cooling: 1x 250 V ~
Network technology	RS485 Modbus
Power supply	90..265 V ~
Measuring range temperature	-10..+50 °C
Accuracy temperature	±1 °C
Sensor type	NTC10k
Changeover Sensor	NTC10k (optional)
Inputs	Passive sensor
LCD	Large LCD screen Touchscreen White background lighting
Ambient temperature	+10..+50 °C

LCT

The electronic room thermostat is designed for controlling temperature in commercial, industrial and residential buildings and also underfloor heating applications. LCD temperature display, dial set point and relay on/off output. Additional input is available for an external temperature sensor if required.

TECHNICAL DATA

Relay output	Heating: 1x 250 V ~, max. 16 A Heating: 1x 30 V =, 10 A
Power supply	100..240 V ~
Load current	250 V ~, 16 A
Measuring range temperature	0..+40 °C
Accuracy temperature	±1 °C
Sensor type	NTC100k
Inputs	NTC100k (optional)
LCD	Display for temperature and set point
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white
Installation type	Surface mounting
Notes	Set point adjustment for floor temperature: +5..+40 °C Set point adjustment for room temperature: +5..+30 °C

Temperature

High-quality materials, modern production processes, and many years of experience: We produce temperature sensors for various applications in buildings for heating, refrigeration and air conditioning systems.

Sample applications

125	SFK03	Temperature sensor liquid temp.	171
	SFKH03	Temperature sensor liquid temp.	175
	RGS03	High temperature sensor	179

Room sensors

WRF04	Surface mount temperature sensor	128
WRF06	Flush mount temperature sensor	130
RDF18	Temperature sensor ceiling	132
RPF40	Pendulum temp. sensor large rooms	133
RPF100	Pendulum temp. sensor large rooms	135

Duct sensors

AKF10 – 4 mm	Air temperature sensor	137
AKF10 – 7 mm	Air temperature sensor	140
SI-Protection	Sensor protection against moisture	144
KFK01	Air temperature sensor	145
KFK03	Air temperature sensor	148
MWF	Averaging temperature sensor	152
RG03	High temperature sensor	154
TFR	Thermostat frost protection	156

Immersion sensors

SFK02	Temperature sensor liquid temp.	157
SFKH02	Temperature sensor liquid temp.	161
SFK01	Temperature sensor liquid temp.	165
SFKH01	Temperature sensor liquid temp.	168

Outdoor sensors

AGS43	Outdoor temp. sensor	181
AGS54	Outdoor temp. sensor	182
AGS54 ext.	Outdoor temp. sensor	183

Contact sensors

VFG54	Temperature sensor pipe	185
AF25	Temperature sensor pipe	187
PR25	Temperature sensor pipe	189
OF14	Temperature sensor glass surface	191

Cable sensors

TF14	Cable temperature sensor	193
TF25	Cable temperature sensor	197

» BENEFITS

- » Temperature sensors for various applications and harse environments
- » Numerous passive temperature sensors, active outputs and Bus systems are available
- » High protection against external factors due to special high end manufacturing processes

1

VFG54
Contact temperature sensor, available with LON or Modbus interfaces

2

AF25
Cable/Contact temperature sensor, various cable lengths are available

3

TF25
Cable temperature sensor, available with LON interface

OPTIMUM TEMPERATURE FOR YOUR APPLICATION

Our sensors are available in various designs and with numerous temperature sensor options, active outputs and BUS systems. Special manufacturing processes guarantee reliable operation even in demanding applications.

» BENEFITS

WRF04
custom paint alusilver

WRF04

For temperature measuring, with set point and fan stage adjustment, manual override for room and office applications..

TECHNICAL DATA

Output voltage	1x 0..10 V (V) pass. Sensor (S)
Output Amp	1x 4..20 mA (A)
Output BUS	BACnet MS/TP KNX LON RS485 Modbus
Power supply	15..24 V = (±10%) or 24 V ~ (±10%) KNX: Supply via BUS TRA: 15..24 V = (±10%)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 0,4 W (24 V =) 0,8 VA (24 V ~) LCD TRV: typ. 0,6 W (24 V =) 1,0 VA (24 V ~) BACnet: typ. 0,4 W (24 V =) 0,6 VA (24 V ~) KNX: 0,6 W / 1,2 VA LON: typ. 0,5 W (24 V =) 1,7 VA (24 V ~) LCD LON: typ. 0,8 W / 2,0 VA RS485 Modbus: typ. 0,4 W (24 V =) 0,6 VA (24 V ~) LCD RS485 Modbus: typ. 0,4 W (24 V =) 0,6 VA (24 V ~)
Measuring range	TRA1/TRV1: -50..+50 °C TRA3/TRV3: 0..+50 °C TRA8/TRV8: -15..+35 °C Range adjustable at the device BUS: 0..+50 °C depends on used sensor (passive)
Accuracy temperature	±1% of measuring range (typ. at 21 °C) depending on used sensor (passive)
LCD	29x12 mm, monochrome (optional)
Ambient temperature	-35..+70 °C
Cable entry type	Rear entry or top/bottom of enclosure
Protection	IP30
Terminal block	Terminal block, max. 1,5 mm ²
Wires (number)	4-wire (passive) 3-wire (passive) 2-wire (passive, standard)
Enclosure colour	pure white
Enclosure material	ASA
Installation type	Installation on standard flush mounting box. Base enclosure can be mounted separately.
Notes	Stainless steel enclosure Custom paint possible

AKF10 Ø=7 mm

Duct/Immersion sensor for measurement of air temperature and other gaseous medi- ums for HVAC applications (e.g. supply and exhaust ducts). Can be used as a immersion temperature sensor combined with a thermowell pocket.

TECHNICAL DATA

Output voltage	1x 0..10 V (V) pass. Sensor (S)
Output Amp	1x 4..20 mA (A)
Output BUS	LON RS485 Modbus
Power supply	15..24 V = (±10%) or 24 V ~ (±10%) TRA: 15..24 V = (±10%)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 0,4 W (24 V =) 0,8 VA (24 V ~) LON: typ. 0,5 W (24 V =) 1,7 VA (24 V ~) RS485 Modbus: typ. 0,7 W (24 V =) 1,8 VA (24 V ~)
Measuring range	TRA1/TRV1: -50..+50 °C TRA2/TRV2: -10..+120 °C TRA3/TRV3: 0..+50 °C TRA4/TRV4: 0..+160 °C TRA5/TRV5: 0..+250 °C TRA8/TRV8: -15..+35 °C depends on used sensor (passive) LON: -45..+130 °C RS485 Modbus: -20..+120 °C Range adjustable at the device
Tmax	+160 °C (only end of sensor) +260 °C (only end of sensor) (optional)
Accuracy temperature	±1% of measuring range (typ. at 21 °C) LON: ±0,5 K depending on used sensor (passive)
LCD	34x21 mm (optional), black and white, with white background
Ambient temperature	-35..+70 °C
Cable entry size	M16 M20 M20 double
Protection	IP65 SI-Protection
Terminal block	Terminal block, max. 1,5 mm ²
Wires (number)	2-wire (passive, standard) 3-wire (passive) 4-wire (passive)
Enclosure colour	pure white
Enclosure material	PA6 with quick lock screws
Pocket material	Stainless Steel 1.4571
Pocket length	62 mm, 135 mm, 192 mm, 240 mm, 320 mm 392 mm, 465 mm
Pocket diameter	7 mm

SI-PROTECTION for Protection of Sensors

Changes in temperature are causing formation of humidity. Thus, there is a risk that the humidity can permeate in the contact point of the sensor. As a result, the sensor would corrode and oxygenate. Thus, the contact point would become unreliable. The SI-Protection procedure provides the contact point with epoxy gum and a fluidized bed coating which unites with the insulation material of the wire. Thus, a complete unit is built protecting the sensor against vibrations and humidity.

By means of this protective coating our temperature sensors can be used in cold water or outdoor applications without any problems, for example. In addition the roller-burnishing protects the pocket of the sensor against the permeation of humidity.

Protection against mechanical overstress
SI-Protection
 humidity and vibration

Sensor with SI Protection

Humidity sealed pocket (rolled)

KFK01

KFK01

Passive duct sensor for measurement of air temperature and other gaseous mediums for HVAC applications (e.g. supply and exhaust ducts).

KFK03

KFK03

Duct sensor for measurement of air temperature and other gaseous mediums for HVAC applications (e.g. supply and exhaust ducts).

TECHNICAL DATA

Output voltage	1x 0..10 V (V) pass. Sensor (S)
Output Amp	1x 4..20 mA (A)
Power supply	15..24 V = ($\pm 10\%$)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 1 W (24 V =) 1,4 VA (24 V ~)
Measuring range	TRA1/TRV1: -50..+50 °C TRA2/TRV2: -10..+120 °C TRA3/TRV3: 0..+50 °C TRA4/TRV4: 0..+160 °C TRA5/TRV5: 0..+250 °C depends on used sensor (passive)
Tmax	+160 °C (only end of sensor) +260 °C (only end of sensor) (optional)
Accuracy temperature	TRA: $\pm 0,2$ °C/ $\pm 0,1\%$ of measuring range TRV: $\pm 0,1\%$ of measuring range depending on used sensor (passive)
Ambient temperature	-25..+70 °C -25..+90 °C (passive)
Cable entry size	M20
Protection	IP66 SI-Protection
Terminal block	Terminal block, max. 1,5 mm ²
Wires (number)	2-wire (passive, standard) 3-wire (passive) 4-wire (passive)
Connection head shape	Shape B, Aluminium
Pocket material	Stainless Steel 1.4571
Pocket length	100 mm 150 mm 200 mm 250 mm
Pocket diameter	8 mm
Notes	Please contact us for other sensors.

TFR-R

TFR

Temperature thermostat for frost protection for HVAC systems. The TFR freezestat can be used to enable the following frost protection functions: fan, close outside air dampers, open heating coil valve 100%, switch-off chiller (condenser) and humidifier, triggering a visual and/or audible frost alarm.

TECHNICAL DATA

Setpoint adjustment range	-10..+14 °C
Ambient temperature	-35..+70 °C
Cable entry size	M16
Protection	IP65
Terminal block	Terminal block, max. 2,5 mm ²

SFK01

Passive immersion sensor complete with integrated thermowell pocket for temperature measurement of liquids in pipework applications.

TECHNICAL DATA

Measuring range temperature	depending on used sensor
Tmax	+160 °C (only end of sensor) +260 °C (only end of sensor) (optional)
Accuracy temperature	depending on used sensor
Ambient temperature	-25..+90 °C (passive, connection head)
Cable entry size	M16
Protection	IP65 SI-Protection
Terminal block	Terminal block, max. 1,5 mm ²
Wires (number)	2-wire (passive, standard) 3-wire (passive) 4-wire (passive)
Connection head shape	Shape J, aluminium die cast metal
Thread	G1/2"
Pocket material	Stainless Steel 1.4571
Pocket length	50 mm 100 mm 150 mm 200 mm 250 mm 450 mm
Pocket diameter	8 mm
Notes	Please contact us for other sensors.

Protection against mechanical overstress

RGS03

RGS03

Immersion sensor (high temp) complete with integrated thermowell pocket for temperature measurement of liquids in pipework applications.

TECHNICAL DATA	
Output voltage	1x 0..10 V (V) pass. Sensor (PT100)
Output Amp	1x 4..20 mA (A)
Power supply	15..24 V = ($\pm 10\%$)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 1 W (24 V =) 1,4 VA (24 V ~)
Measuring range	TRA6/TRV6: 0..+400 °C TRA7/TRV7: 0..+600 °C PT100 (passive): max. 600 °C
Tmax	+500 °C (temporarily +600 °C)
Accuracy temperature	TRA: $\pm 0,2$ °C/ $\pm 0,1\%$ of measuring range TRV: $\pm 0,1\%$ of measuring range depending on used sensor (passive)
Ambient temperature	-25..+70 °C (Connection head) -25..+90 °C (passive, connection head)
Cable entry size	M20
Protection	IP66
Terminal block	Terminal block, max. 1,5 mm ²
Wires (number)	3-wire (passive)
Connection head shape	Shape B, Aluminium
Thread	G1/2"
Neck pipe material	Stainless steel 1.4305
Neck pipe length	100 mm
Neck pipe diameter	9 mm
Pocket material	Stainless Steel 1.4571
Pocket length	250 mm 500 mm
Pocket diameter	9 mm
Notes	incl. mounting flanges Please contact us for other sensors.

AF25

AF25

Temperature measurement on pipes and round surfaces. Designed for control and monitoring applications.

TECHNICAL DATA

Output voltage	1x 0..10 V (TRV)
Output Amp	1x 4..20 mA (TRA)
Power supply	TRA: 15..24 V = ($\pm 10\%$) TRV: 15..24 V = ($\pm 10\%$) or 24 V ~ ($\pm 10\%$)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 0,4 W (24 V =) 0,8 VA (24 V ~)
Measuring range	TRA1/TRV1: -50..+50 °C TRA2/TRV2: -10..+120 °C TRA3/TRV3: 0..+50 °C TRA4/TRV4: 0..+160 °C TRA8/TRV8: -15..+35 °C Range adjustable at the device
Measuring range temperature	depending on used sensor (passive)
Accuracy temperature	depending on used sensor (passive)
Ambient temperature	-35..+100 °C
Cable entry size	M20
Protection	SI-Protection
Terminal block	Terminal block, max. 1,5 mm ²
Connection wire length	1 m (Standard) 2 m 4 m 6 m
Connection wire	PVC
Connection wire diameter	0,25 mm ²
Wires (number)	2-wire (passive, standard) 3-wire (passive) 4-wire (passive)
Pocket material	Brass
Pocket length	35 mm
Pocket diameter	6 mm

TF25 active

TF25

Temperature measurement for HVAC applications. In conjunction with a Thermowell pocket suitable temperature measurement in immersion temperature applications. Designed for control and monitoring applications.

TECHNICAL DATA	
Output voltage	1x 0..10 V (TRV) pass. Sensor (S)
Output Amp	1x 4..20 mA (TRA)
Output BUS	LON RS485 Modbus
Power supply	15..24 V = ($\pm 10\%$) or 24 V ~ ($\pm 10\%$) TRA: 15..24 V = ($\pm 10\%$)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 0,4 W (24 V =) 0,8 VA (24 V ~) LON: typ. 0,5 W (24 V =) 1,7 VA (24 V ~) RS485 Modbus: typ. 0,9 W (24 V =) 1 VA (24 V ~)
Measuring range	TRA1/TRV1: -50..+50 °C TRA2/TRV2: -10..+120 °C TRA3/TRV3: 0..+50 °C TRA4/TRV4: 0..+160 °C TRA5/TRV5: 0..+250 °C TRA8/TRV8: -15..+35 °C Range adjustable at the device LON: -45..+130 °C RS485 Modbus: -20..+120 °C depends on used sensor (passive)
Accuracy temperature	RS485 Modbus: ± 1 °C bei 25 °C TRA/TRV: $\pm 1\%$ of measuring range LON: $\pm 0,5$ K depending on used sensor (passive)
Display	34x21 mm (optional), black a/nd white, with white background
Ambient temperature	-35..+70 °C Special silicone: -60°C..+250°C GI/GI-V2A: -50..+400 °C PVC: -35..+100 °C Silicone: -50..+180 °C
Cable entry size	M20 M20 double
Protection	IP43 (hex pressed) IP67 (Rolled with SI-Protection)
Connection wire length	1 m (Standard), 2 m, 4 m, 6 m
Connection wire	PVC, Silicone, Special silicone
Connection wire diameter	0,25 mm ²
Wires (number)	2-wire (passive, standard) 3-wire (passive), 4-wire (passive)
Enclosure colour	pure white
Enclosure material	PA6, with quick lock screws
Pocket material	Stainless Steel 1.4571
Pocket length	50 mm, 100 mm, 150 mm, 200 mm, 250 mm
Pocket diameter	6 mm, 6,5 mm (LON)
Notes	Please contact us for other sensors.

Humidity

Humidity sensor for reliable detection of relative humidity and temperature in residential and commercial buildings, outdoor resp. in gaseous media of heating, ventilation and air conditioning systems.

Sample applications 205

Room sensors

FTW04	Surface mount sensor Temp. + rH	206
FTW06	Flush mount sensor Temp. + rH	208
FP_FTP	Room pendulum Temp. + rH	209
FSR	Room humidistats air conditioning, ...	211

Duct sensors

FTK-SX	Duct sensor Temp. + rH	212
FTK	Duct sensor Temp. + rH (BUS)	214
FSK01	Duct humidistats air	216

Outdoor sensors

FTA54	Outdoor sensor Temp. + rH	217
-------	---------------------------	-----

Condensation / Leakage

WK01	Condensation sensor	219
LS02	Water leak detection	220

» BENEFITS

- » Reliable measurement of relative humidity
- » High Accuracy
- » Optional combined temperature sensor

ALREADY WET HANDS?

Whether room or duct: Highest precision in relative humidity is of paramount importance. Not only for creating comfortable working conditions, a consistent and accurate monitoring of humidity is necessary. In increasingly isolated buildings, hazardous mold formations get observance to the sustainable protection of humans and the building. In order to act preventively and to control this risk, humidity sensors are additionally equipped with temperature sensors and designed for communication in BUS systems, for wireless EnOcean communication and for direct hook-up.

FTW04

FTW04 with setpoint adjuster and LCD

FTW04

Room humidity and temperature sensor for room and space monitoring and control applications.

TECHNICAL DATA	
Output voltage	2x 0..10 V (VV) 2x 0..10 V + pass. Sensor (VVS)
Output Amp	2x 4..20 mA (AA) 2x 4..20 mA + pass. Sensor (AAS)
Output BUS	BACnet MS/TP KNX LON RS485 Modbus
Measuring of	AA/VV: Temperature + humidity (active) AAS/VVS: Temperature + humidity (active + passive) BUS: Temperature + humidity
Power supply	15..24 V = (±10%) or 24 V ~ (±10%) AA/AAS: 15..24 V = (±10%) KNX: via BUS
Power consumption	AA/AAS: max. 40 mA VV/VVS: max. 0,3 W (24 V =) 0,5 VA (24 V ~) BACnet: typ. 0,4 W (24 V =) 0,6 VA (24 V ~) LON: typ. 0,6 W / 1,2 VA RS485 Modbus: typ. 0,4 W (24 V =) 0,6 VA (24 V ~)
Measuring range temperature	0..+50 °C
Measuring range humidity	0..100% rH
Accuracy temperature	±1% of measuring range (typ. at 21 °C)
Accuracy humidity	±2% at range 10..90% rH (typ. at 21 °C)
Ambient temperature	-20..+70 °C
Cable entry type	Rear entry or top/bottom of enclosure
Protection	IP30
Connection clamp	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white
Enclosure material	ASA
Mounting	Installation on standard flush mounting box. Base part can be mounted and wired separately
Notes	Additional passive sensor available (please specify in order). e.g.: PT100, PT1000, NI1000, NI1000TK5000, LM235Z, NTCxx, PTCxx, other sensors on request. Setpoint adjuster available on request Custom paint possible

LS02

LS02

Water leak detection sensor with LED signal and relay output. Designed for alarm, control and monitoring applications.

TECHNICAL DATA

Output others	24 V: Relay (volt free contact) max. 24 V / 1 A (ohmic)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 25 mA
Sensor type	4 detector elektrodes
LED	LED green: Operation LED red: Alarm
Ambient temperature	-35..+70 °C
Cable entry size	M16
Protection	IP65
Terminal block	Terminal block, max. 1,5 mm ²
Contact pins material	Stainless steel
Enclosure colour	pure white
Enclosure material	PA6
Notes	Ajustment in height is possible using adjustable contacts

Pressure & Velocity

Pressure and air flow sensors for cooling and air conditioning must resist extreme conditions. Therefore our products are customized to withstand even the harshest environments.

Sample applications 223

Gases

DPA	Differential pressure transmitter	224
DPT	Differential pressure transmitter	226
PS	Differential pressure switch	228
DPI	Electronic differential switch	229

Flow Meter / Air Velocity

DPT Flow	Flow meter	230
AVT	Air velocity and temp. transducer	231

Manometer

MM	Differential pressure manometer	232
MM-PS	Diff. pressure manometer/switch	233
DPG	Differential pressure manometer	234
DPG PS	Diff. pressure manometer/switch	235

Fluids

DLM	Pressure transmitter	236
DPL	Differential pressure transmitter	239

» BENEFITS

- » Reliable detection of pressure, differential pressure & velocity.
- » High protection

THE CORRECT PRESSURE

Our customized pressure and flow rate sensors are used for monitoring of pressure, differential pressure, flow rate of liquids and non-flammable gases in air filters, industrial air cooling cycles and ventilation ducts.

NEW

DPA

DPA Display

DPA

Differential pressure transmitter with 8 selectable ranges and adjustable outputs (0..10 V or 4..20 mA) or Modbus output. For monitoring the differential pressure of air and other non-flammable and non-aggressive gases. Possible applications: Monitoring of air filters, fans, industrial cooling air cycles as well as overheating protection, control of air and fire dampers.

TECHNICAL DATA

Output differential pressure	0..10 V or 4..20 mA (selectable) RS485 Modbus
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	TRA: max. 20 mA / 24 V = TRV: typ. 1,1 W (24 V ~) 1,7 VA (24 V ~) RS485 Modbus: typ. 1,4 W (24 V ~) 2 VA (24 V ~)
Operating temperature range	-10..+50 °C
Measuring range pressure	DPA250: 0..+25 Pa, 0..+50 Pa, 0..+100 Pa, 0..+250 Pa, -25..+25 Pa, -50..+50 Pa, -100..+100 Pa, -150..+150 Pa DPA2500: -100..+100 Pa, 0..+100 Pa, 0..+250 Pa, 0..+500 Pa, 0..+1000 Pa, 0..+1500 Pa, 0..+2000 Pa, 0..+2500 Pa DPA7000: 0..+1000 Pa, 0..+1500 Pa, 0..+2000 Pa, 0..+2500 Pa, 0..+3000 Pa, 0..+4000 Pa, 0..+5000 Pa, 0..+7000 Pa selectable at device For other ranges please request
Max. working overpressure	400 kPa
Accuracy pressure	±1,5% of greatest measuring range ±6 Pa at range <250 Pa
Ambient temperature	-10..+50 °C
Cable entry size	M20
Protection	IP65
Terminal block	Terminal block, max. 1,5 mm ²
Connection	DPT-R8: 3-Wire RS485 Modbus: 4-wire
Connection wire	PVC, soft
Enclosure material	PA6
Included standard accessories	2 mounting screws 2 plastic duct flanges 2 m PVC connection tube

DPT Flow

DPT Flow is an ideal device for monitoring and controlling the air flow and for measuring flow rate of centrifugal fans. The flow rate measurement is based on differential pressure values measured directly from the fan. DPT Flow can be used to display the flow value on-site and to send the output value to a control system.

TECHNICAL DATA	
Output voltage	2x 0..10 V (flow meter/differential pressure)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Operating temperature range	-5..+50 °C
Measuring range pressure	0..1000 Pa 0..5000 Pa depending on device Ask for more ranges.
Max. working overpressure	50 kPa
Accuracy pressure	DPT Flow-1000/5000: ±5 Pa and ±1,5% screen display
Supported ventilation manufacturer	Comferi EBM-Pabst Fläkt Woods Gebhardt Nicotra Rosenberg Ziehl-Abegg
Display	LCD for indication of measuring values and for setup
Cable entry size	M16
Protection	IP54
Terminal block	Terminal block, max. 1,5 mm ²
Connection wire	PVC, soft
Enclosure material	PC ABS
Included standard accessories	2 mounting screws 2 plastic duct flanges 2 m PVC connection tube
Notes	Automatic, periodical zero point calibrations for a better long term stability. Please contact us for other ranges.

AVT

Air velocity and temperature transducer is engineered for building automation in the HVAC/R industry. The AVT measures air velocity and temperature, with field selectable range and output options in a single device.

TECHNICAL DATA

Output airflow/temperature	2x 4..20 mA 2x 0..10 V selectable at the device
Output others	Relay (volt free contact), 230 V ~ / 6 A, 30 V = / 6 A (optional)
Power supply	15..24 V = ($\pm 10\%$) or 24 V ~ ($\pm 10\%$)
Measuring range	Air velocity 0..2 m/s, 0..10 m/s or 0..20 m/s, selectable at the device
Measuring range temperature	0..+50 °C
Luftgeschwindigkeit	0..2 m/s, 0..10 m/s, 0..20 m/s (selectable on device)
Display	LCD for indication of measuring values (optional)
Cable entry size	M16 double
Protection	IP54
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure material	PC ABS
Pocket material	Stainless Steel 1.4571
Pocket length	210 mm
Notes	Incl. mounting flanges

Air Quality

Mixed gas and CO₂ sensors allow individual and demand-dependant control of external air supply. In modern buildings the use of these sensors is essential in creating energy savings and the comfort levels with the living and working conditions.

Sample applications 243

CO₂

WRF04 CO ₂	Room air quality sensor CO ₂	246
LC-WRF04 CO ₂	Room air quality sensor CO ₂	248
WRF06 CO ₂	Flush mount air quality sensor CO ₂	249
LK-SX CO ₂	Duct air quality sensor CO ₂	250
LK-S CO ₂	Duct air quality sensor CO ₂ (BUS)	251
LK CO ₂	Duct air quality sensor CO ₂ (large)	252

VOC

LW04	Room air quality sensor VOC	253
LK-SX VOC	Duct air quality sensor VOC	254

CO₂+VOC

LK-SX CO ₂ +VOC	Duct air quality sensor CO ₂ /VOC	255
----------------------------	--	-----

» BENEFITS

- » Reliable detection of CO₂ and mixed gases (VOC)
- » Physical and emotional well-being through individual demand-dependant control of external air supply
- » Automatic self-calibration for CO₂ “Dual Channel”
- » Optional temperature and humidity integrated

 <p>1</p> <p>LK-SX 4xV Duct sensor CO₂/ temperature/ relative humidity, outputs 0...10 V</p>	 <p>2</p> <p>LK CO₂ Duct sensor CO₂, suitable for larger air ducts</p>	 <p>3</p> <p>WRF04 CO₂ Room sensor CO₂/temperature/relative humidity, available with display and traffic light indication</p>
--	---	---

>> ALL CO₂ SENSORS WITH AUTOMATICAL SELF CALIBRATION

OPTIMUM ENVIRONMENTAL CONDITIONS

Our CO₂ and mixed gas sensors reliably detect the indoor air quality in ventilation ducts and individually and demand-dependent control the external air supply. These intelligent air quality sensors create optimal environmental conditions - even in hospitals.

- » Physical and emotional well-being through individual demand-dependant control of external air supply
- » Automatic self-calibration for CO₂ “Dual Channel”
- » Optional temperature and humidity integrated

>> ALL CO₂ SENSORS WITH AUTOMATICAL SELF CALIBRATION

EXCELLENT WORKING ATMOSPHERE

Our CO₂ sensors allow individual, demand-dependant control of external air supply in large open offices and improve the working atmosphere and conditions.

WRF04 CO₂

WRF04 CO₂-Z / WRF04 CO₂ LCD

WRF04 CO₂

Surface mounted sensor for detection of CO₂, temperature and optional relative humidity in room and office spaces. For direct connection to a DDC or a monitoring system, using 0..10 V outputs. Also available with traffic light LED and LCD display.

TECHNICAL DATA

Output voltage	2x 0..10 V (VV) 3x 0..10 V (3xV)
Output BUS	BACnet MS/TP LON RS485 Modbus
Measuring of	V: CO ₂ + temperature 3xV: CO ₂ + temperature + humidity BUS: CO ₂ + temperature + humidity (opt.)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	max. 3 W (24 V =) 6 VA (24 V ~)
Measuring range CO ₂	0..2000 ppm
Measuring range temperature	0..+50 °C
Measuring range humidity	0..100% rH
Accuracy CO ₂	±75 ppm or 10% of measuring range (typ. at 21 °C)
Accuracy temperature	±1% of measuring range (typ. at 21 °C)
Accuracy humidity	±2% at range 10..90% rH (typ. at 21 °C)
Calibration	Self calibration dual channel
Sensor type	NDIR
LCD	29x12 mm, monochrome (optional)
Traffic light functionality (-Z)	3 LEDs showing air quality (opt.)
Ambient temperature	0..+50 °C
Ambient humidity	max. 85% rH non condensed
Cable entry type	Rear entry or top/bottom of enclosure
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white
Enclosure material	ASA

LC-WRF04 CO₂

LC-WRF04 CO₂

Surface mounted sensor for detection of CO₂ and temperature (passive, optional) in room and office spaces. Also possible with operating elements. For direct connection to a DDC or a monitoring system, using 0..10 V outputs.

TECHNICAL DATA

Output voltage	1x 0..10 V (V) 1x 0..10 V + pass. Sensor (VS)
Measuring of	V: CO ₂ VS: CO ₂ + temperature (passive)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	max. 3 W (24 V =) 6 VA (24 V ~)
Measuring range CO ₂	0..2000 ppm
Measuring range temperature	depending on used sensor (passive)
Accuracy CO ₂	±75 ppm or 10% of measuring range (typ. at 21 °C)
Accuracy temperature	depending on used sensor (passive)
Calibration	Self calibration dual channel
Sensor type	NDIR
Ambient temperature	0..+50 °C
Ambient humidity	max. 85% rH non condensed
Cable entry type	Rear entry or top/bottom of enclosure
Protection	IP20
Terminal block	Terminal block, max. 1,5 mm ²
Enclosure colour	pure white
Enclosure material	ASA

Measuring of	VV: CO ₂ + VOC 3xV: CO ₂ + VOC + temperature or CO ₂ + VOC + mix CO ₂ /VOC 4xV: CO ₂ + VOC + temperature + humidity or CO ₂ + VOC + temperature + mix CO ₂ /VOC
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	max. 1,5 W (24 V =) 2,9 VA (24 V ~)
Measuring range CO ₂	0..2000 ppm
Measuring range temperature	0..+50 °C
Measuring range humidity	0..100% rH
Accuracy CO ₂	±75 ppm or 10% of measuring range (Type. at 21 °C)
Accuracy temperature	±1% of measuring range (typ. at 21 °C)
Accuracy humidity	±2% at range 10..90% rH (typ. at 21 °C)
Calibration	Self calibration dual channel (CO ₂)
Sensor type	VOC-Sensor NDIR
Ambient temperature	0..+50 °C
Ambient humidity	max. 85% rH non condensed
Cable entry size	M20
Protection	IP65
Terminal block	Terminal block max. 1,5 mm ²
Enclosure colour	pure white
Enclosure material	PA6
Pipe material	PA6
Pipe color	black
Pipe length	180 mm
Pipe diameter	19 mm
Filter material	Stainless steel, wire mesh
Notes	With mix CO ₂ /VOC output ration of CO ₂ /VOC can be chosen (values: 30/70%, 50/50%, 70/30%) MF19 flange included. Mixed gas sensors detect gases and vapours which can be oxidised (burnt): Body odours, tobacco smoke, exhalations emitted by materials (furniture, carpets, paint, glue ...).

HOTEL SECURITY AND ENERGY-EFFICIENCY

Intelligent light, motion and multi sensors detect reliably light and motion and control lighting on as required. The guest feels safe and comfortable, the hotel owner saves energy.

MDS

MDS

Ceiling mounted multi sensor designed for measuring light and motion in room and offices spaces and typically used in lighting applications to optimize energy efficiency through lighting control. Low profile design with various output signals compatible to all BMS manufacturers.

TECHNICAL DATA

Output voltage	0..10 V, load max. 10 mA
Output BUS	LON
Output others	Normally open contact, max. 24 V / 1 A (not for LON)
Power supply	15..24 V = (±10%) or 24 V ~ (±10%)
Power consumption	typ. 1,2 W / 4 VA LON: typ. 1,5 W / 4,2 VA
Measuring range light	0..1 kLux
Accuracy light	±50 Lux
Off delay	selectable at the device 1 second..30 minutes
Sensor type	4 element PIR (passive infrared) 0..1 kLux, photodiode with green filter
Ambient temperature	0..+50 °C
Protection	IP20
Terminal block	Pluggable screwing terminal, max. 1,5 mm ²
Enclosure colour	pure white
Enclosure material	ABS
Notes	Enclosure for surface mounting available

LDF A straight prism

LDF A diagonal prism

LDF

Ceiling mounted light sensor with straight and diagonal prism options. Integrated colour (green) filter which is adapted to the sensitivity of the human eye.

TECHNICAL DATA

SpannungsversorgungA: 15..24 V = ($\pm 10\%$)

Power consumption A: max. 20 mA / 24 V =
V: typ. 0,4 W (24 V =) | 0,8 VA (24 V ~)
LON: typ. 0,8 W (24 V =) | 1,4 VA (24 V ~)

Measuring range light 0..2 kLux, 0..20 kLux
adjustable via DIP switches

Accuracy light $\pm 5\%$ of measuring range

Sensor type Photodiode with green filter

Prism shape Straight
Angular

Prism material Acrylic glass clear

Ambient temperature -25..+65 °C

Cable entry size M20

Protection IP65

Terminal block Terminal block, max. 1,5 mm²

Connection cable material PVC screened

Connection cable length 2 m, 1 m (Standard)

Connection cable diameter 0,25 mm²

Housing color pure white

Enclosure material PA6

Notes Please contact us for other ranges.

Power Thyristors

Power thyristors can more and more be found where ohmic and inductive loads must be controlled (e.g. in industrial furnaces...) By means of the modular and compact construction and control with a continuous control signal power thyristors become the perfect actuators for industrial power control.

1-phase

TS1 1-phase	Industrial power thyristor
TS3 1-phase	Industrial power thyristor
TS2 1-phase	Industrial power thyristor

3-phase

TS1 3-phase	Industrial power thyristor
TS3 3-phase	Industrial power thyristor
TS2 3-phase	Industrial power thyristor

Phase angle control

268	The phase angle control can be used for almost any ohmic and
269	inductive consumers and is the most common way to control
270	the power consumption of a consumer. The consumer is
	connected to the supply network via the power thyristor. The
	thyristors are controlled in such a way, that the consumer is
271	not supplied with the complete sinusoidal oscillation but only
272	a part (depending on the steering angle), whereas the voltage
273	average value can be adjusted continuously.

Oscillation control

The oscillation control is used with inert consumers like heaters. Contrary to the phase angle control, complete sinusoidal waves are switched through to the consumer with the oscillation control. The control of the average voltage value is made by switching through a certain number of oscillations (depending on the switch-on time) within a certain time slot (clock cycle). Thus convertor feedback effects to the power supply network in form of harmonic components are avoided.

TS1 1-phase

TS1 1-phase

Power thyristors are used as actuators for industrial power controls (e.g. fans, pumps, lamps, heating registers, industrial furnaces). Their solid and compact construction ensures reliable control and and high efficiency.

TECHNICAL DATA

Supply voltage	Internal generation

Glossary

OUTPUTS

A, AA, 2A	1 resp. 2 outputs 4..20 mA; output values depending on product
V, VV, 3xV, 4xV oder 2V, 3V, 4V	1, 2, 3, 4 outputs 0..10 V; output values depending on product
AS, AAS, VS, VVS	1 resp. 2 active outputs + 1 passive output temperature (S)
TRA	Output 4..20 mA, digit for measuring range temperature following
TRV	Output 0..10, digit for measuring range temperature following
TRA1/TRV1	Range -50..+50 °C
TRA2/TRV2	Range -10..+120 °C
TRA3/TRV3	Range 0..+50 °C
TRA4/TRV4	Range 0..+160 °C
TRA5/TRV5	Range 0..+250 °C
TRA6/TRV6	Range 0..+400 °C
TRA7/TRV7	Range 0..+600 °C
TRA8/TRV8	Range -15..+35 °C
MultiRange	Range adjustable at the device

SI-PROTECTION

Changes in temperature are causing formation of humidity. Thus, there is a risk that the humidity can permeate in the contact point of the sensor. As a result, the sensor would corrode and oxygenate. Thus, the contact point would become unreliable. The SI-Protection procedure provides the contact point with epoxy gum and a fluidized bed coating which unites with the insulation material of the wire. Thus, a complete unit is built protecting the sensor against vibrations and humidity.

MEASURING VALUES

rF bzw. rH	relative humidity
Temp.	Temperature
CO2	carbon dioxide measuring value for air quality
VOC	volatile organic compound; measuring value for air quality
Dual Channel	Calibration method for CO2 sensors (automatic self-calibration)

COMMUNICATION

EasySens	Thermokon radio based on EnOcean IEC 14543-3-10
BACnet	BACnet MS/TP, communication protocol specifically designed for building automation; BACnet IP, if mentioned in catalogue
KNX	EIB-KNX interface
LON	LON FTX, communication protocol specifically designed for building automation; other standards, if mentioned in catalogue
Modbus	RS485 Modbus RTU

ROOM OPERATING UNITS OPERATING ELEMENTS

P	Potentiometer (setpoint adjustment)
MS	Slide switch
S	Switch (e.g. for fan stages)
T	Button (e.g. for occupancy status)
D	LED
LCD/-D	Inclusive display
-Z	Traffic light showing air quality (3 LEDs)
-R	Relay

TERMS AND CONDITIONS

Orders

We will happily take your order by phone, email or fax, stating the product name and item number from the catalogue. Please do not hesitate to contact us for technical support or support with specific applications or sensor technology.

Delivery Time

We stock a variety of standard sensors in limited quantities, of which delivery is within 1 week, often immediately after receipt of order. Delivery times for larger quantities or custom designs available on request.

Pricing

All prices are list prices in € and do not include value added tax. Prices are valid from 1st April 2015. All previous prices are invalid.

Delivery Conditions

Delivery is done ex works by parcel or forwarding service, excluding cost for packing / insurance.

Terms of Payment

Within 14 days net.

Product return

Catalog products can be returned within a period of 6 months after delivery, for 2/3 credit of the initial purchase price. Only unused products in original packing will be accepted. Custom manufactured products such as room sensors with control elements, custom engraving, custom varnish or custom printing can not be returned.

Our general business and guarantee conditions are available on www.thermokon.com or can be send to you on request. Subject to technical and price modifications; no responsibility is accepted for the accuracy of this information. Illustrations may vary.

5 YEARS WARRANTY ON ALL PRODUCTS!

Publisher: Thermokon Sensortechnik GmbH, Platanenweg 1, 35756 Mittenaar, CEO Harald Zygan
